

Hi Senators,

I greatly respect the focus that you are putting on Australian immigration policies. I have been participating in many websites such as social networking, connecting groups, and blogs and discussion boards since long time; never I heard a single bad intention on anyone's mind against Australia. I and many of students are proud of the Australian government faring very well in the deep recession times and its development strategies.

Furthermore, the conflict among people started when the immigration capping bill has been approved in favor of Chris Evans. You may be receiving thousands of submissions on migration capping but this one is vital. If you did not want these many GSM applications about (1, 47000 approx) then you should have stopped giving student visas when these outnumbered relating to the requirement about 2 yrs ago. Since the bill has already been passed you may not consider taking these suggestions into consideration. The step that you have taken up has hit thousands of GSM applicant's feelings and has shattered their dreams. I appeal to Prime Minister Kevin Rudd and Chris Evans to meet all the applicants that are going to be rejected and ensure that no one suicides themselves or get depressed or leave out of this country and swearing about Australia. As a responsible tax payer I never wanted anyone saying a single bad word about Australia. Australia has plenty of opportunities and it's a great multicultural country (I hope the sentence wouldn't turn otherwise).

On behalf of heartbroken students, I request to please consider this suggestion and open this document in the next session in the parliament. Please don't hurt people and their ambitions. I praise Prime Minister Kevin Rudd for his outstanding efforts in placing Australia as a peaceful country.

I end this message with tears as I am one of them who fell into depression as soon I heard the news,

Thanking you,
Yours sincerely,
An

Australian.
