

Hello,

I would like to make a submission into the enquiry regarding the "Environment Protection (Beverage Container Deposit and Recovery Scheme) Bill 2009".

I very much support the idea of a coordinated national program to better encourage recycling and recovery of beverage containers. As a South Australian resident we already benefit from a scheme of this nature, and it has significant benefits here in reducing waste and saving resources. This bill to create a consistent national scheme for beverage recycling (and financial incentives to do so) thus would extend the benefits of such a program to all Australians.

Sincerely,

Patrick Sunter,
