SENATE INQUIRY INTO WIND FARMS

I am a Portland resident and have been working at Keppel Prince Engineering for 3 years. I am an apprentice boiler maker.

I support wind farms for many reasons:

- They are good for the environment.
- They create a lot of work for companies such as Keppel Prince.
- They are a tourist attraction here in Portland.
- They are not noisy.
- I surf a lot and can see the wind farms at the beach and like the look of them.
- I find it hard to understand how people could get sick from living near them.

Thanks for the opportunity to put forward my opinion,

Will Little
