

**SENATOR THE HON LINDA REYNOLDS CSC
MINISTER FOR THE NATIONAL DISABILITY INSURANCE SCHEME
MINISTER FOR GOVERNMENT SERVICES
SENATOR FOR WESTERN AUSTRALIA**

MC21-005568

The Hon Kevin Andrews MP
Committee Chair
Joint Standing Committee on the National Disability Insurance Scheme
PO Box 6100
CANBERRA ACT 2600

Dear Mr Andrews 

Thank you for your letter of 24 June 2021 regarding the Joint Standing Committee on the National Disability Insurance Scheme's (NDIS; the Committee) current inquiry into Independent Assessments.

I would like to thank the Committee for facilitating opportunities for all Australians, no matter where they live, to have their say on the proposed reforms. As you know, independent assessments will not be proceeding as previously proposed. I look forward to continuing to work collaboratively with you as the inquiry continues, to provide advice to the Committee on work to be undertaken with those with lived experience of disability to co-design a model for assessments to improve the participant experience, and maximise flexibility, choice and control in a manner that is safe, respectful, effective and, above all, fair.

I am pleased to attach responses to the questions you provided (**Attachment A** and **Attachment B** refer). In providing you with this additional information, I would also like to affirm my commitment to carefully considering how best to deliver on the promise of the NDIS and am very serious about listening to the views of all those affected as to how we can achieve this vision.

Thank you again for writing.

Yours sincerely

Linda Reynolds

Encl: Responses to Questions Raised (**Attachment A**) and Data Requested (**Attachment B**).

Financial Sustainability of the NDIS

1. How is the Commonwealth portion of the NDIS budget funded, and how much of the NDIS budget originates from the DisabilityCare Australia fund and the Medicare levy?

Commonwealth funding for NDIS participant supports is drawn from the Consolidated Revenue Fund.

The cost to consolidated revenue is partially offset by payments to the Commonwealth from the DisabilityCare Australia Fund (DCAF) funded by a permanent increase to the Medicare Levy.

The DCAF was established on 1 July 2014 with the purpose of reimbursing the states, territories (the states) and Commonwealth for expenditure incurred under the *National Disability Insurance Scheme Act 2013* (NDIS Act). Credits to the DCAF are funded from the increase of the Medicare Levy from 1.5 per cent to 2.0 per cent which took effect from 1 July 2014.

The Department of Finance's Portfolio Budget Statements (PBS) include estimated reimbursements to the Commonwealth. Current estimates show the Commonwealth receiving \$4 billion per annum from 2020-21 to 2024-25 from the DCAF. Over the same 4 years estimated total Commonwealth outlays on the NDIS exceed \$74 billion.

Payments from DCAF are also made to states. DCAF reimbursements to states are scheduled to total \$9.7 billion over the 10 years between 2014-15 and 2023-24 (inclusive). These payments are made under the National Partnership on DisabilityCare Australia Fund Payments.

2. What modelling underpinned the cost projections of the Productivity Commission's report in 2011, and why have these projections proved incorrect?

The assumptions underpinning the Disability Care and Support Productivity Commission Inquiry Report (2011) (Productivity Commission Report) are outlined in Chapter 16 of that report. The main data source used to estimate the costs of the Scheme was the 2009 Survey of Disability, Ageing and Carers (Australian Bureau of Statistics). The survey included information on both activity limitations and disabling conditions. This information was used to estimate a distribution of support need (that is, the number of participants in each functional support group and the expected average cost of each group). The Productivity Commission Report estimated that if the Scheme were fully operational in 2011, it would cost \$13 billion. The 2011 costing only included participants up until the age of 65, when it was assumed participants would leave the Scheme to be supported by other government systems/programs – in particular, aged care.

In practice, the Scheme has departed from the expectations in the original Productivity Commission Report in part due to:

- Changes in scope such as people remaining in the Scheme after reaching the age of 65; the inclusion of specialised school transport and personal care in schools; numbers of children with development delay accessing the Scheme, and provision of some disability health-related supports.
- Injury not caused by motor accidents or in the workplace - The Productivity Commission Report estimate assumed the recommended National Injury Insurance Scheme (NIIS) would be fully implemented by the states and include general and medical accident streams in addition to workplace and motor vehicle accident streams. To date neither the medical nor general streams have been established, with the result that people under the age of 65 who

are significantly and permanently disabled by injury as a result of medical misadventure or general accidents not otherwise covered may seek support through the NDIS.

In 2017 the Productivity Commission published a report on its study of NDIS costs that updated the 2011 Productivity Commission Report modelling – in particular allowing for participants to age past 65 years in the Scheme; inflation in disability sector wages to that point and updated population projections. Even so, the experience of the Scheme has departed from these updated projections, in particular due to:

- Slower than expected initial growth in the numbers of participants and differences in the mix of participants, including higher numbers of children with autism and developmental delay. The current overall number of participants (466,600) is still marginally below the 2017 Productivity Commission estimate for the first year of full Scheme operation (475,000 estimated to be reached in 2019-20). Total participants will exceed 475,000 in the next month or two and are forecast to continue to grow significantly into the future, exceeding the 2017 Productivity Commission estimates.
- Higher average expenditure per participant. Average annualised payments have continued to increase year on year. Overall, the average annual increase in average payment per participant is 12.5 per cent over the last four years. Over the past four years, the mix of participants in the Scheme has changed. That is, as the Scheme has rolled out across the country, the proportion of participants by different characteristics has changed. As examples, the proportion of children in the Scheme is higher in 2020-21 compared with 2017-18, and the proportion of Supported Independent Living (SIL) participants in the Scheme is lower in 2020-21 compared with 2017-18. Analysing the change in average payment over time by whether or not participants are in SIL indicates that the average annual increase in average payment has been consistently high across both participant groups. Specifically, the average annual payment has increased for SIL participants by 17 per cent, and the average annual payment has also increased for non-SIL participants by 17 per cent. These averages are higher than the overall average (of 12.5 per cent), as the proportion of participants in SIL has decreased over the period.

More detail is included in the NDIA interim update to the Annual Financial Sustainability Report (AFSR) summary available at: www.ndis.gov.au/news/6590-ndis-financial-sustainability-report-release.

3. Why have Government cost projections in the past year varied (between estimates, the 2021-22 Budget, and information provided to this committee and reported in the media)?

It is very important to note that estimates of outlays on participant supports in the forward years are just estimates. The Government has repeatedly stated its commitment to fully funding the NDIS as a demand driven scheme. This means that if outlays on participant supports are higher than estimated, the Government will provide additional funds to the extent required to meet those higher outlays.

Estimates for Commonwealth benefit programs that are long standing with highly specified payments and eligibility criteria – such as the medical and pharmaceutical benefits schemes, the aged pension, the disability support pension and JobSeeker are, in most circumstances, stable and predictable in terms of outlays. The recent exception has been the impact of the current pandemic on employment and JobSeeker.

In contrast the NDIS has only been available nationally since mid-2019, and there were still substantial numbers of people transitioning into the Scheme in 2019-20. In 2020-21 there are still more than 6000 people each month applying for the Scheme and being found eligible. Compared to many social benefit programs associated with large outlays, eligibility for the NDIS is not highly specified, nor is the amount of funding made available to each participant, instead being based on more subjective and individual assessment.

As a demand-driven scheme, estimates of the cost of the NDIS (as published at Budget and MYEFO), are based on the estimated number of participants in the Scheme, and the estimated level of expenditure of funds by these participants (based on their anticipated needs and circumstances).

Estimates have been updated between the 2020-21 and the 2021-22 budgets reflecting continued stronger growth in participant numbers and spend per participant.

The interim update to the AFSR summary released on 3 July 2021 gives further detail as to forward growth assumptions, and assumes a lesser effect of cost growth mitigation actions than the Budget estimates.

The NDIA also released a straight line cost projection in the 2020-21 third quarter report on the scheme. The different basis of the preparation of these various estimates and projections explains the different results. Nevertheless all three reporting and monitoring processes show strongly increasing costs.

4. How will independent assessments help to ensure the financial sustainability of the scheme, and why must they be compulsory?

On 9 July 2021, at the Disability Reform Ministers' meeting, Ministers agreed with the Independent Advisory Council's recommendation, such that independent assessments will not proceed as proposed. Instead, Ministers agreed to work in partnership with those with lived experience of disability and disability representatives to co-design a new person-centred assessment model that ensures fairness and equity.

There is a legislative requirement to assess people's capacity under the *National Disability Insurance Scheme Act 2013*. Because there has been no standard information required to inform decisions about access and planning, there is concern that there may be significant variation in decisions made (similar people in similar circumstances getting different decisions), and that there is apparent bias in decision making, for example, with those who have greater resources on average getting more generous plans. There is also concern that because it is hard to evaluate and compare decisions made on quite different information, that there is a degree of subjectivity in how decisions are made.

The intention of independent assessments was to provide a better basis for ensuring the NDIS supports those it is intended to support to become participants, at a consistent level related to a persons assessed functional capacity, circumstances identified specific needs for some kinds of supports, and that they receive a plan which they can use flexibly, with more choice and control to pursue their goals.

5. What other options, besides independent assessments, has the Government considered to help ensure the financial sustainability of the scheme?

Other changes include: improved training and guidance for decision makers; greater awareness by decision makers of comparable decisions being made by their fellow decision makers; internal escalation of decisions that on the face of it depart significantly from similar decisions; so that another decision maker can review the proposed decision prior to it being made. Also there have been systematic changes to the way in which decisions about SIL support are made – moving away from a quote based system to a maximum price the Agency is willing to pay for a ‘fully loaded’ cost of delivering an hour of support in a SIL setting in line with all other supports for activities of daily living.

The Early Childhood Early Intervention Reset proposes use of better targeted early intervention to address the needs of children with developmental delay, with a view to improving children’s functioning and reducing the extent to which they need to become long term participants in the Scheme.

Work is also underway to:

- improve detection of fraud and minimise payment errors, and to process compensation recovery claims when participants have received duplicate funding from other insurance/compensation schemes;
- ensure price controls remain appropriate and are aligned to settings in adjacent sectors;
- provide better guidance on the boundaries of the NDIS, including the supports provided by other mainstream service systems; and
- an effective National Disability Strategy to improve accessibility of government services and raise awareness of the services throughout the community of people with disabilities to ensure appropriate connectivity to services and supports outside of the NDIS.

6. Why did the Government decide that independent assessments would be the best approach to solve the problems facing the scheme?

The former independent assessment model was not the only measure proposed to improve the Scheme, however a better more consistent evidence base and more consistency in decision making is essential to the medium to long term sustainability of the Scheme, and to providing a better basis for understanding whether the Scheme is supporting participants to achieve improvements in their lives.

The NDIS supports hundreds of thousands of people with quite different disabilities living in widely different circumstances, with differing backgrounds and at different stages of their lives. Working with people to understand what is working and what is not has to have regard to their individual views and experiences, but it should also include analysis of measurable outcomes. Having better standardised methods of assessing functional capacity is not the whole story, but it is an important part of understanding whether and how the Scheme is working and for whom.

Importantly, all governments must continue working together to deliver on the promise of the NDIS – to provide people with permanent and significant disability with greater choice and control over the supports they purchase to pursue their goals and aspirations.

This will be the focus of future work in partnership with those with lived experience of disability and disability representatives to co-design a new person-centred assessment model that ensures fairness and equity.

7. Has the Government established an NDIS Reserve Fund, as indicated in Commonwealth/state/territory bilateral agreements that underpin the establishment of the scheme?

No. In NDIS full scheme agreements between the Commonwealth and the states (except Western Australia (WA) which is not due until 2023), parties agreed to establish an NDIS Reserve Fund built from accumulated cash in the Scheme. The NDIS Reserve Fund has not yet been established and has been referred to the Council of Federal Financial Relations (CFFR) as part of the broader review of existing funding arrangements between the Commonwealth and the states.

At the Disability Ministers Meeting of 24 July 2020, state and territory ministers agreed to formally submit advice on the design of the Reserve Fund to CFFR. CFFR will further consider the implementation of the Reserve Fund once states have submitted advice on the design of the Reserve Fund to CFFR, or indicated they will not be doing so.

In the meantime, current arrangements continue whereby unspent NDIS contributions from the Commonwealth and the states remain with the National Disability Insurance Agency.

8. What alternative measures did the Government implement or consider implementing to replace the proposed National Disability Insurance Scheme Savings Fund to help ensure the financial sustainability of the NDIS?

In the 2018-19 Budget, the Government committed to fully funding its contribution to the NDIS from the Consolidated Revenue Fund as part of the ongoing cost of the Government's core business. Therefore, the NDIS Savings Fund was no longer required to be established and the *National Disability Insurance Scheme Savings Fund Special Account Bill 2016* was no longer pursued.

9. What assumptions underpin the NDIS actuarial models?

The assumptions that underpin the NDIS actuarial models are detailed in the interim update to the AFSR summary available at: www.ndis.gov.au/news/6590-ndis-financial-sustainability-report-release.

10. Please provide the relevant actuarial data, risk assessment profiles and short and long-term modelling that led the Government to conclude that the NDIS is on an unsustainable growth trajectory, and all other relevant information that indicates that the cost of the scheme will differ from the Productivity Commission's original projections.

The actuarial projection of Scheme costs is included in the interim update to the AFSR summary released on 3 July 2021. This report includes detail on the assumptions which underpin the projections. The actuarial projection is higher than both the 2021-22 PBS and the 2017 Productivity Commission costings. The AFSR is available at: www.ndis.gov.au/news/6590-ndis-financial-sustainability-report-release.

Table 1. Total Participant costs: 2021–22 PBS, 2017 Productivity Commission and AFSR summary

Total participant costs (\$m)	2021-22	2022-23	2023-24	2024-25	Total
2017 Productivity Commission Estimates	23,664	25,158	26,740	28,351	103,914
Portfolio Budget Statements 2021-22	26,487	28,257	29,425	31,884	116,054
Dec20 Annual Financial Sustainability Report (accrual)	28,139	32,900	36,906	40,659	138,603
Difference between 2021-22 PBS and 2017 PC	2,823	3,099	2,685	3,533	12,139
Difference between AFSRDec20 and 2017 PC	4,475	7,742	10,166	12,308	34,689
Difference between AFSRDec20 and 2021-22 PBS	1,651	4,642	7,481	8,775	22,550

11. Please provide in full (not summary form) all Financial Sustainability Reports since 2015.

The NDIA released the interim update AFSR Summary on 3 July 2021. The NDIA is committed to undertaking further work to allow disability ministers to understand the assumptions and cost drivers that underpin the actuarial modelling.

The Chairman of the NDIA committed to Ministers at the Disability Reform Ministers Meeting (DRMM) held 9 July 2021 that the NDIA Board would positively consider releasing the 2021 AFSR in full when it is available later in the year. The NDIA advises that prior AFSR's were prepared solely for consideration by the Board in accordance with the NDIS Act.

12. Taking into account decisions made to improve the financial sustainability of the scheme, the introduction of independent assessments, the forecast number of new NDIS participants, the forecast number of participants expected to leave the NDIS, and projected price increases, what is the projected change in average participant budgets and in the number of participants expected to remain in the scheme, over the next ten years?

The interim update to the AFSR Summary report released on 3 July 2021 includes:

- projections of average annualised per participant costs;
- the forecast number of participants (net growth including new arrivals and those exiting);
- past trends and assumptions of future exit rates; and
- past trends and assumptions about inflation including price changes.

This report uses data to 31 December 2020. The projections contained in it are underpinned by an actuarial model with growth assumptions based on data capture on the operation of the Scheme held by the NDIA.

The projections do not fully include the impact of efforts to mitigate growth in costs, in particular initiatives to improve the Scheme's fairness, consistency, flexibility and affordability, as described in the NDIA's quarterly report to Disability Ministers for the quarter ending 31 March 2021.

Current inequity in funding for participants

13. How will the reforms the Government is proposing address postcode inequality? Will proposed reforms lead to a reduction in the average spend on plans for participants from higher socioeconomic backgrounds, or an increase in the average spend on plans for participants from lower socio-economic backgrounds?

At the DRMM on 9 July 2021, Ministers' agreed with the Independent Advisory Council's recommendation that independent assessments do not proceed. Ministers' agreed to work in partnership with those with lived experience of disability through the Independent Advisory Council and disability representatives to co-design a new person-centred assessment model that ensures fairness and equity.

Quarterly data for the period ending March 2021 shows that those with lower socio-economic status on average have lower plan budgets than those with a higher socio-economic status – which suggests those who have greater means have greater access to assessments and reports. Where a person lives has also been shown to influence a person's ability to produce information required to support decisions about their eligibility for the NDIS and their plan funding.

As proposed, independent assessments would have been free of charge, using standard approaches and undertaken by allied health professionals. The intention was that the information gained from the assessments would not vary according to people's capacity to pay for reports and assessments, and that cost is not a barrier to becoming an NDIS participant.

It is anticipated that co-design of person-centred assessments will also seek to address fairness, consistency and to minimise costs to participants.

Personalised budget profiles

14. Please provide the 400 personas/profiles developed to date and mentioned in the Personalised Budgets technical paper to the committee. Will the NDIA publicly release details about these profiles once they are completed?

15. Will independent assessments generate a score, and will specific dollar amounts be attached to these scores? If yes, how will these specific dollar amounts be decided, and what will they be?

16. How will the Government use the results of independent functional assessments, which the allied health sector has told us have to date been used for diagnostic purposes, to determine plan funding amounts? What evidence and/or research basis proves that assessments can be used accurately and equitably to determine budgets?

Disability Reform Ministers agreed on 9 July 2021 that the proposed independent assessments would not proceed, and legislative changes would not include the proposed approach to plan budgeting described in the Personalised Budgets technical paper. The approach to plan budgeting, as described in the Personalised Budgets technical paper, will not proceed.

Oversight

17. Were the independent assessments pilots and trials subject to an independent ethics test and if not, why not?

The NDIA is committed to maintaining the highest ethical standards in the conduct of any quality assurance, research and evaluation projects involving participants, in particular being sensitive to the welfare and interests of people involved. To implement this, the NDIA has established a range of policies and procedures to ensure compliance with, and maintenance of, ethical standards as prescribed by National Health and Medical Research Council guidelines (the NHMRC guidelines) – recognising that participants, being people with a disability, are considered to be a vulnerable group in accordance with these guidelines.

The evaluation fell within the scope of a quality assurance activity in accordance with the Ethical Considerations in Quality Assurance and Evaluation Activities guideline (NHMRC 2014) (the NHMRC Evaluation Guideline), noting that it involved the collection of health information. Information regarding a person's disability is considered to be health information in accordance with Australian privacy legislation.

The Independent Assessment Pilot fell into the same quality assurance scope by way of a qualified Allied Health Professional conducting an independent assessment in a person's home with consent from a participant, or their carer. As the pilot used standardised tools and didn't change participant outcomes (e.g. funding allocations) it was deemed that it was minimal risk and therefore didn't fall within the purview of research regulations.

However, given the nature of the pilot, to ensure the safety of participants only qualified Allied Health Professional with minimum practical experience of 1 year conducted the assessments, in addition accountability systems were generated including quality assurance and complaint management systems to ensure that feedback could be acted upon in a timely way. Participation in the pilot was entirely voluntary.

In addition to this, further protections included taking into account consent, privacy, relevant legislation, and national/professional standards to ensure the safety of the participant. The collection of personal, health and sensitive information matched how the Agency manages participant data, which ensures the highest standards of privacy and data security were maintained consistent with the privacy legislation.

In accordance with the NHMRC guideline, full Human Research Ethics Committee approval was not obtained. Appropriate processes were put into place by both the evaluation and pilot administering team to ensure the safety of participants.

18. What integrity and accountability measures does the Government intend to put in place to ensure that independent assessments themselves will be consistent, reliable and valid, outside review by the Administrative Appeals Tribunal of National Disability Insurance Agency decisions? Is there any reason why the results of independent assessments should not be subject to external review outside the National Disability Insurance Agency?

Disability Reform Ministers agreed on 9 July 2021 that independent assessments not proceed.

It is anticipated that a person-centred assessment model, co-designed with representatives of people with disability, would include appropriate integrity and accountability measures.

19. What measures will the Government implement to ensure that independent assessments do not cause harm for participants?

Disability Reform Ministers agreed on 9 July 2021 that independent assessments not proceed. Instead a person-centred assessment model, co-designed with representatives of people with disability is proposed. It is anticipated this work would carefully consider issues relating to participant risks.

Data concerning participants

20. Please provide a breakdown of the following:

- a. The total number of participants by postcode who have plans (and whether this number includes children in the ECEI pathway).
- b. The number of ECEI participants by electorate and postcode who have plans.

Please see attached tables.

21. Please provide a breakdown of the following by electorate and postcode:

- a. The total number of participants, and the average and median amounts of budgeted funding for all participants who have plans, by year since 2015.
- b. The total number of participants, and the average and median amounts of utilised funding for all participants who have plans, by year since 2015.
- c. The total number of participants, and the average and median amounts of budgeted and utilised funds for participants with plans who did not receive funding for Supported Independent Living, by year since 2015.
- d. The total number of participants, and the average and median amounts of budgeted and utilised funds for participants who have received funding for Supported Independent Living, by year since 2015.
- e. The total number of participants, and the average and median amounts of budgeted funding for all participants who have plans, by year since 2015, according to whether the plan is a first or subsequent plan.
- f. The total number of participants, and the average and median amounts of utilised funding for all participants who have plans, by year since 2015, according to whether the plan is a first or subsequent plan.
- g. The total number of participants, and the average and median amounts of budgeted funding for all participants who have plans, by year since 2015, according to whether the plan is self-managed, plan-managed or agency-managed.
- h. The total number of participants, and the average and median amounts of utilised funding for all participants who have plans, by year since 2015, according to whether the plan is self-managed, plan-managed or agency-managed.
- i. The total number of participants, and the average and median amounts of budgeted funding for all participants who have plans, by year since 2015, according to their primary disability type.
- j. The total number of participants, and the average and median amounts of utilised funding for all participants who have plans, by year since 2015, according to their primary disability type.
- k. The total number of participants, and the average and median amounts of budgeted funding, for ECEI participants who have plans, by year since 2015.
- l. The total number of participants, and the average and median amounts of utilised funding, for ECEI participants who have plans, by year since 2015.

Please see attached tables.
