Submission to the Joint Standing Committee on Treaties.

Treaty of Marrakesh should be supported.

Griffin Press is one of Australia's largest Book Printers.

We own the latest highly specialised digital book printing equipment which enables books as low as a single copy to be economically produced.

We have been working with Christopher Stephen of Read How You Want, and, Accessible Publishing systems PTY LTD, of Buckingham Street Surry Hills NSW, for over 5 years, producing individual copies of large Print books prepared especially for reading impaired people, in runs as short as a single copy.

Griffin Press print for many of the major Publishing companies in Australia and Overseas. We hold an archive of tens of thousands of book files.

With the Originating Publishers approval, these files can be easily recreated into new accessible reading formats, which Griffin Press can economically produce in printed form.

Accessible Publishing systems have the technology to recreate book files into individualised print format to the needs of specific readers.

This technology has never been implemented due the difficulty of clearing the rights, however should the statutory licence approach be adopted this can be readily implemented by Accessible Publishing Systems and Griffin Press.

We support the submission made by Accessible Publishing Systems PTY LTD.
