

NOBODY WORSE OFF COALITION

Harm Tracker Report

Make Harm Visible

The Harm Tracker is a national tool to report how NDIS cuts are hurting people. It is an independent, grassroots, public interest project. It is co-designed with Disabled people, led by Disabled people and created in partnership with Allied Health workers.

We collect real stories from people all over Australia to show what's really happening. These voices help expose the impact of these cuts and push for change.
