

Foetal Alcohol Spectrum Disorder (FASD) Activities

Program or Project Name	Funding (GST Exc)	Funding Period	Description
Marulu: Lililwan Project (co-funded by DoHA and FaHCSIA)	\$1,709,157	2009-10 to 2012-13	This community driven project will determine the prevalence of FASD in the Fitzroy Crossing Valley, WA and facilitate treatment for children diagnosed with FASD. Screening, diagnosis and management strategies may be transferrable.
National Indigenous FASD Resource Project (Due for completion late 2012) (DoHA funded)	\$698,956	2009-10 to 2010-11	To develop culturally appropriate communication resources for health professionals and alcohol and other drug workers.
Development of a Diagnostic Instrument for FASD (DoHA funded)	\$454,544	2009-10 to 2010-11	To develop a diagnostic instrument to assist clinicians in diagnosing babies and children affected by FASD.
AIHW scoping study on data collection (DoHA funded)	\$212,082	2010-11 to 2011-12	To undertake a scoping study on ways to improve FASD data collection and reporting to determine the prevalence of FASD in Australia.
Alcohol screening tools (DoHA funded)	\$20,000	2008-09 to 2010-11	To examine and develop screening tools for alcohol use during pregnancy.

Program or Project Name	Funding (GST Exc)	Funding Period	Description
National Organisation for Fetal Alcohol Syndrome and Related Disorders (NOFASARD) (DoHA funded)	\$193,000	2010-11 to 2011-12	To assist consumer representation in national projects, support for the NOFASARD website and to assist with administration due to significant public interest in a range of FASD issues.
Update of the monograph <i>'Foetal Alcohol Spectrum Disorder in Australia: an update'</i> (DoHA funded)	\$63,518	2011-12	The update the monograph and include information on activities undertaken to date.
New Directions Mothers and Babies (ND M&B) Services program (DoHA funded)	\$480,357	2011-12	Ord Valley Aboriginal Health Service (OVAHS) is funded under ND M&B to improve access to antenatal and postnatal care, improve children's health and early development and facilitate healthy entry to school. One component of the project is "screening and intervention, education programs via clinics and outreach services". The funding amount indicated is the total New Directions funding amount, not the amount allocated specifically to FASD.
FASD program in the Barkly Region in the NT (FaHCSIA funded)	\$325,600	2011-12	Funding to Anyinginyi Health Aboriginal Corporation in Tennant Creek to work with families including women, men, elders and young people to raise awareness of FASD in the community, develop community solutions to dealing with FASD, and work with health and other professionals to support families living with the effects or potential effects of FASD.
