

To whom it may concern

On behalf of the school library staff at Lynwood Senior High School in Western Australia we would like to enforce to you the following points:

Reference point 1:

School libraries must be staffed with professional staff to organise and maintain and organise the reading resources and facilities.

Teacher librarians operate curriculum programs that will benefit all students.

Reference point 2:

Teacher Librarians teach students to be lifelong learners using a wide range of information technology through a variety of teaching programs. Libraries are a resource for life .

Reference point 5:

The government needs to ensure that school from socio economic areas have the same access to technologies as private schools. Teacher librarians can then include these technologies in their teaching programmes to enable all students to develop their skills and knowledge.

Many thanks
