

The Chairman and Committee members
Joint Standing Committee - Electoral Matters
Australian Parliament

Queensland 2007 Australian Senate Election

Please find attached

1. A revised summary count sheet for the 2007 Queensland Senate Count - Wright System
2. A copy of Analysis of the 2007 Queensland Senate Count - Meek's method by David Hill, UK
3. A summary comparison report of Meek's, Wright and the AEC 2007 Queensland Senate counts

The Meek's method is an approximation non-linear count where as the Wright System uses a linear counting method.

The summary count report, using both the Meek method and the Wright System, have produced the same overall result, highlighting the deficiency in the current system in use. This is predominately due to the implementation of a reiterative count process which more accurately reflects the voters intention then the system applied by the Australian Electoral Commission.

The two main areas of contention being

1. The method used in calculation the *Surplus Transfer Value and*
2. The system of distribution of preferences associated with an excluded candidate.

Anthony van der Craats

Thanks and appreciation to *David Hill* for providing the analysis and count by the *Meek Method*.

2007 Queensland Senate Count Summary Report

Meek's Method by David Hill
