

A

Dear Secretary,

Tamworth Regional Council would support a program that brings skilled people to the district.

We recognise we are not the only inland city wanting to attract people to work, and we recognise that the people we seek are generally Gen X and Y, with some younger Baby Boomers. Our primary need is to fill mid & higher career positions.

We would be willing to join in any Regional Employment group that provided career positions for people wanting to move out of the cities for personal / family reasons, yet not willing to sacrifice their careers in a dead end job. This means we would like to join a collaborative group of employers who are marketed as providing good positions in the country and who share career development processes. Ie Employers of Choice in the country!

The roles we are keen to target include:

Engineering
Water Engineering
Building Inspectors
Planners
Plant mechanics
Laboratory managers (water quality testing etc)
Venues technicians (theatre, country music festival etc)
Librarians
Horticulture and Recreation management
Survey and Design
HR Graduates

Thank you

Liz Thorby
