

Dear Sir/Madam,

I am in support of any skilled migrant who wants to come to this country and work and pay taxes and enjoy our wonderful lifestyle.

I have had the opportunity to live in the Netherlands for 2 years and Singapore for 3 years and to travel to many countries around them.

We currently have the best country in the world to live in, let's keep it that way.

Why has immigration become so divisive..because the immigrants coming in are divisive.

We don't have enough water or electricity to cope with our current population, so where will we be in ten years time?

Lets fix the basics first then we will have a place for more people from overseas.

Kind regards,
