

**Australian Parliament
Joint Standing Committee on Migration
Submission no. 271**

Dear Maria Vamvakinou,

I am writing in concern for the direction of our nation on the subject of multiculturalism. My husband & I are not from a migrant community, but as most Australians have a love for our Nation & the direction she is going is of great concern for our future & the future of our children.

We are great believers in loving others as yourself & find our hearts reaching out to those in refugee camps, who truly are escaping Nations of hostility & life threatening situations. & we say welcome to a Nation of safety & freedom. What a blessed Nation we have been, they say we have been called the lucky country & we have had the pleasure to grow up in a place of safety & assurance of peace. For us to say we are unwilling to share that would be a great sadness & lack of love for man kind.

But we are faced now with another issue altogether, & at a fast pace are heading towards losing her safety & peace. We are faced with warnings from other European Nations, who have walked one step ahead of us & are saying be on your guard there is something you do not understand that is going on beneath, that is not seen until it is too late. They have experienced not a welcoming of other people, but a taking over by other Religious Cultures. We are a Christian Nation & that has given us its freedom, its love, its care for all people, its beauty..

The Question is are we willing to give that away, are we willing to have others dictate to us their ways of ruling a Nation. Ways that have proven in history to be detrimental to the people, oppressive & the kind of Nations that people find themselves running from. Sadly it seems that is where we are heading, & our leaders are letting it happen without constraint, & we its citizens sit wondering why there is such a blindness to what is coming for us, as it has already in Europe....

People in France have been driven from their work places & homes from over population of Islamic groups in threats & fear of their lives. One whole county in America has been taken over in political positions & police forces by Muslim groups to such a point that they are now beginning to practice Sharia law in their courts. But our leaders remain oblivious to its impact on the Nations & on ours.

Please consider the future of our Nation, the future of standing for our Christian freedom & our faith. It is what made our Nation what it has been in the past..... A BLESSED NATION!

Our prayers are with you, that you be strong & stand for the people in our Christian Nation AUSTRALIA, also called the Great South Land of the Holy Spirit. Something we should take pride in & not be willing to give up.

The Lord be with us all in Yeshua's name
