

**Australian Parliament
Joint Standing Committee on Migration
Submission no. 306**

We are a nation of one culture and that is Australian. I am not a racist - I have 2 sons in law born elsewhere and I was once married to a man from another country.

People come to Australia to escape from other cultures and as soon as they get here they want to change our precious lifestyle to be like

the very place they escaped from. Not on. This is a country populated by people from many countries and cultures BUT it is not multicultural. All people should be treated the same with the justice of Almighty God for everyone.

It is high time our Government set the choice before them as soon as they arrive. I have a wonderful piece said by President Roosevelt in 1908 or thereabouts regarding this matter and it hits the nail on the head in setting down the expectation of the people to the immigrants.
