

**Australian Parliament
Joint Standing Committee on Migration
Submission no. 435**

I do object to the current policy on immigration allowing predominately Muslim so called refugees into this country they are the biggest manipulative group around ,are lying deceitful and dangerous. Strange to see the bulk of refugees are Muslim males and young ones at that , I think it is about time the Government took a stand and stopped the influx of these pretentious refugees.

The Muslim element I have seen do not make any effort to learn our language or customs , and as for dress I think the Muslim women should be made to at least show their faces in public , religion is the excuse, well it is not the religion here so they should adopt not have us make changes to their ways . I thought this was our country not theirs, one would have a hard time finding an Australian who actually is happy with the current trend , about time the Pollies took note and did something about the situation. Stop the Muslim imports they have buggered their own country and are looking for nothing more than a free handout at others expense. Their are much more deserving refugees in the world the those currently making their way here.
