To whom it may concern,

Please consider this as my submission regarding my concerns with the incredible increase in strata insurance for units in Cairns. I am a unit owner, and do not understand how this huge increase can be justified.

The unit I own is less than 5 years old and was built within the stringent building regulations and guidelines for far north Queensland, which are designed specifically for the weather extremes that is a tropical cyclone area; therefore we are already insured accordingly and pay the price for living in these conditions.

I look forward to the outcomes of your investigation

Kim Vine
