

My name is Anders Dunder and I live in Cairns in north Queensland and I have as many others been affected by the rising costs of insurance premiums which have affected the body corp where I live.

I'm the proud father of a beautiful girl who will turn 5 months shortly. The rising insurance premiums act as a burden and strains our economy and reduces our consumption power.

As a result we have to cut back on eating out and other activities which could benefit the local economy positively.

Therefore we would like to have a "fair go" on insurance premiums in Queensland. We want to pay our premiums, but we want to have premiums which are affordable and just.

Best regards,

Anders Dunder
