Appendix D – ADF Personnel deployed to Afghanistan killed in action ........ 167
Over the last 15 years, Australia’s Defence Forces have been almost continuously involved in operations from Africa to the Solomon Islands, and everywhere in between. Unfortunately not all those that have deployed on operations have returned, and some that have returned, have done so with wounds and scars, not all of which are necessarily visible.

The Defence Sub-Committee welcomed the opportunity presented by this Inquiry to consider the treatment of personnel wounded and injured on operations, their repatriation to Australia, on-going care and return to work, or transition out of the Defence Force.

In our inquiry, we have examined the concerns of wounded and injured members themselves, identified opportunities to improve governmental services provided to them, and looked at some of the perceived or actual barriers preventing full access to support services. We delved deeply into the concerns related to post traumatic stress disorder (PTSD) and other mental health issues, and explored the importance of the involvement of, and support to, families in the recovery process of the wounded and injured.

With the recent increased awareness of the effects of depression, anxiety disorders, substance abuse and indeed PTSD, and issues surrounding suicide rates amongst current and former servicemen and women, the inquiry was particularly timely. Indeed, as can be seen from the evidence we received, there is a broad community concern at the effect that service, operational or otherwise, is having on members and their families.

Part of Australia’s national identity is formed around the courage and sacrifice of our uniformed services, from the beaches of Gallipoli to the mountains and deserts Afghanistan. The modern veteran has, in common with the shell-shocked or maimed Digger of World War I or the Vietnam veteran, the right to the best support and services that the country can provide. Since the First Gulf War, over 45,000 Australians have seen operational service and, even with the prospect of a
reduced tempo of operations, the support of this new cohort of veterans must develop on the lessons of the past and continue to be improved.

The Committee considers that, for the most part, the care provided to Australia’s wounded and injured is world class, particularly in the immediate aftermath of a battlefield incident. The Departments of Defence and Veterans’ Affairs have honoured their responsibilities to support the recovery and rehabilitation of these individuals and their families and, through various programs, continue to improve veteran support processes and coordination.

Unfortunately, some veterans still ‘fall through the cracks’. This has to end.

We have developed a series of recommendations to ensure a comprehensive rehabilitation process for the physically wounded; that all forms of mental health issues in our service, ex-service and veteran communities are fully understood and supported; that the importance of families is fully recognised; and that communication and coordination between all agencies involved in the support of our veterans, government and non-government, is optimised.

In the course of the Inquiry, the Committee had the opportunity to travel to a number of cities and meet individuals and organisations supporting Australia’s veterans – the Committee thanks them, and everyone else so involved, for their contribution. Importantly, the Committee were honoured to meet representatives of those who have put themselves in harm’s way in defence of our nation’s values, and who are carrying scars as a result – the Committee salutes each one.

I conclude by thanking members of the Defence Sub-Committee for their contribution to the inquiry. We were able to work in a true spirit of bi-partisanship, which is what the Parliamentary Committees do best. Finally, as always, I thank our servicemen and women for their dedicated contribution to the security of our nation.

List of recommendations

3 Aeromedical Evacuation

Recommendation 1
The Committee recommends that the Department of Defence continue to make regular contributions to Fisher House as an ongoing measure of Australia’s appreciation for the service provided to our wounded soldiers, until such time that Australian soldiers are no longer deployed to Afghanistan.

Recommendation 2
The Committee recommends that the Department of Defence and the Australian Taxation Office ensure that Australian Defence Force personnel medically evacuated to Australia retain tax free status for the notional length of their operational deployment, or the actual length of the deployment of their unit, per subsection 23AG(1) of the Income Tax Assessment Act 1936.

Recommendation 3
The Committee recommends that the Department of Defence ensure that Australian Defence Force personnel medically evacuated to Australia continue to accrue War Service Leave and allowances for the notional length of their operational deployment, or the actual length of the deployment of their unit.

Recommendation 4
The Committee recommends that the Department of Defence and the Australian Taxation Office assist Australian Defence Force personnel previously medically evacuated, and to whom Recommendations Two and Three would have applied, to make successful retrospective claims for reimbursement.
4 A Badge of Honour

Recommendation 5
The Committee recommends that the Department of Defence annually publish detailed written assessments of garrison health care contractor key performance indicator statistics. The Committee further recommends that the written assessments include the results of an ongoing survey of Australian Defence Force personnel regarding their experiences with the performance of garrison health care contractors.

Recommendation 6
The Committee recommends that the Department of Defence address the shortcomings in Reservist post-deployment support mechanisms identified in this Inquiry as a priority.

5 Mental Health Concerns

Recommendation 7
The Committee recommends that the Department of Veterans’ Affairs accept complimentary therapies as legitimate treatment for psychological injuries if there is an evidence-based clinical reason to do so.

Recommendation 8
The Committee recommends that the Department of Defence publish periodic detailed written assessments on:

- The implementation of the recommendations of both the 2009 Review of Mental Health Care in the ADF and Transition through Discharge, and the 2010 ADF Mental Health Prevalence and Wellbeing Study;
- The Australian Defence Force mental health reform program; and
- What additional enhancements have been made to current programs, as indicated in the Defence White Paper.

Recommendation 9
The Committee recommends that the departments of Defence and Veterans’ Affairs undertake a study into psychological support of partners and families of Australian Defence Force (ADF) members and ex-ADF members. The Committee further recommends that the study be
conducted with the objective of developing recommendations to overcome partners’ and families’ mental health issues that may be highlighted by the study.

The Committee further recommends that the Government implement, as a priority, the recommendations of *The Health and Wellbeing of Female Vietnam and Contemporary Veterans* report.

**Recommendation 10**

The Committee recommends that the effectiveness of psychological first aid be made a research priority by the Department of Defence, in consultation with the Department of Veterans’ Affairs.

### 6 Falling Through the Cracks

**Recommendation 11**

The Committee recommends that the departments of Defence and Veterans’ Affairs expedite the development of a unique service/veteran health identification number.

**Recommendation 12**

The Committee recommends that the Government conduct a cost-benefit study of a comprehensive uncontested veteran healthcare liability model and publish the results.

**Recommendation 13**

The Committee recommends that the departments of Defence and Veterans’ Affairs coordinate to clarify the Australian Defence Force/Veteran service delivery models to reduce the complexity, overlaps and gaps in service identified in this report.

The Committee further recommends that it be provided with a progress report within six months, and a final implementation report within 12 months.

**Recommendation 14**

The Committee recommends that a wounded or injured soldier who wishes to remain in the Defence environment and applies for a position within the Australian Public Service, for which they have the required skills and competencies, be selected preferentially.
The Committee further recommends that the Government encourage private sector providers to take a similar approach to the preferential employment of wounded and injured soldiers.

**Recommendation 15**

The Committee recommends that the departments of Defence and Veterans’ Affairs expedite the rectification of information technology connectivity issues.

The Committee further recommends that it be provided with a progress report within six months, and a final implementation report within 12 months.

**Recommendation 16**

The Committee recommends that:

- as an immediate priority, the national healthcare community include a military/ex-military checkbox as a standard feature on all medical forms; and

- the Government commission a longitudinal tracking system to identify the engagement of military/ex-military personnel with the healthcare system.

7 **Return from Operations**

**Recommendation 17**

The Committee recommends that the departments of Defence and Veterans’ Affairs sponsor a program of research examining the development of post-deployment syndromes in the current veteran cohort, be it relating to mild traumatic brain injury or some other cause.

**Recommendation 18**

The Committee recommends that the Department of Defence review the adequacy and rigour of pre- and post-deployment health checks.
Recommendation 19

The Committee recommends that the Department of Defence provide all troops returning from operations, including non-warlike operations, targeted psychological first aid and post-deployment psycho-education which should include:

- Education on human responses to trauma;
- Identification of basic signs and symptoms of mental health conditions; and
- Advice on assistance options.

Recommendation 20

The Committee recommends that the departments of Defence and Veterans’ Affairs conduct an assessment of suicide rates in the military/ex-military community as a priority.

Recommendation 21

The Committee recommends that the departments of Defence and Veterans’ Affairs establish strategic research priorities to address suicide attributable to defence service.

Recommendation 22

The Committee recommends that the Department of Defence establish formal, Defence-wide pre- and post-deployment training for service families, and a periodic contact program for the families of deployed members.

8 Veterans Affairs

Recommendation 23

The Committee recommends that the Department of Veterans’ Affairs:

- Review the Statements of Principles in conjunction with the Repatriation Medical Authority with a view to being less prescriptive and allowing greater flexibility to allow entitlements and compensation related to service to be accepted;
- Periodically publish reports measuring success in adhering to their client service model;
Periodically publish claim processing times; and

Periodically publish claim success rates.

**Recommendation 24**

The Committee recommends that the Department of Veterans’ Affairs conduct a study, and publish the results, reflecting the issues raised in evidence during the Inquiry, concerning:

- Developing a standardised approach to recruitment, including the preferential recruitment of ex-service members as Case Managers; and
- Training and ongoing evaluation of Case Managers.

**9 Veterans’ Support Structures**

**Recommendation 25**

The Committee recommends that the Government commission an independent assessment of the need for, and establish if warranted, an appropriate national/state-based veterans’ organisation coordination body.
