

Dear Sir/Madam

PLEASE STOP LOOK and LISTEN

STOP the MDBP – Shred it

LOOK at the people, Towns and Industries the plan will destroy

LISTEN to what we have to say.

We as farmers have spent millions of dollars of our own money NO SUBSIDIES NO HANDOUTS to improve water efficiencies on our own farms We can not farm with any less water and be able to make Any reasonable living and keep updating our equipment to be able to farm more efficiently.

LEARN about the industries & People that rely on the water we do not want to live in the cities.

We are the most efficient farmers in the world producing crops that are well suited to our soils & Climate
Just add water.

There are NO willing sellers, just desperate people, after 10 years of Drought with no rain & little water and therefore NO INCOME, NO WAGE they have borrowed to keep their dream and family alive.

Please LISTEN & LEARN why we need COMMON SENSE and that there is enough rainfall in Australia all we need is a good way of harvesting it, with DAMS, PIPES and STORM WATER reuse in the cities.

DO NO STEAL OUR WATER Harvest the water that runs out to sea without any restraint IT CAN BE DONE
