

To Mr Tony Winsor.

Dear Mr Winsor.

Submission No: 579 25-1-2011
Date Received: 25/1/11
Secretary: SC

I would like to voice my concern to you regarding the guide to the draft M & B plan.

Please consider the great harm the decision the M & B.A. seem hell bent on making concerning this area.

The purchase of up to 50% of irrigation water from this area can only bring total disaster to our farming community, which is the food bowl that not only feeds the people of Australia, but also many millions of people over seas.

By removing this water the result will be a dust bowl instead of a food bowl.

I would like to suggest the government build dams, and harvest the water instead of flooding towns, and cities as we are currently seeing in Queensland and Victoria.

The money being spent on the National Broad Band could instead be better spent on Building Dams and insuring the future of Australia.

Please Mr Winsor, consider the impact this decision will have on the farming families, with Bank Mortgages to pay, or the Bank foreclosures and not to mention the desperation of having to walk off the farms, the results being, Broken families & suicides.

Is the government prepared to re compensate these ??

HOUSE OF REPRESENTATIVES STANDING COMMITTEE ON FINANCE AND ADMINISTRATION AUSTRALIA
25 JAN 2011
RECEIVED

If the Government allows the M.D.B.A. to go ahead with this very dishonest decision, all I can say is, this is a reflection of the Labor Party's total disregard of decency and honesty.

I strongly urge you to please recommend this act be changed and I thank you for voting against the act when you did.

Please Mr Winsor, the farming families desperately need your help.

I Thankyou.

Sincerely,

Mary Quorisa
