The Hon Sussan Ley M.P.

Dear Sussan,

It is with great concern I am writing regarding the Murray Darling Basin Plan & the effects it will have on our town. Farmers & the community in the riverina area. There has been 10 yrs of drought & very little water allocation to farmers during this time, it is now heart-breaking to see water running past & not able to be used.

The Murray Darling Basin Plan if its recommendation is adopted by the federal government will close up more & more of our area. Local business, schools, hospitals, property values. There were many vegetables grown in this area & people employed, but now it is slowly disappearing & is very very sad. We do hope something can be done. Labor is killing everything connected to the country.

Yours sincerely L. Brown
