

Subject: Inquiry into IT pricing
Date: Monday, 28 May 2012 7:54:51 AM

Hi,

I am not sure if Fish finders and GPS items come under the scope of this enquiry.

There is a price difference of between 40% to 50% on fishfinders in Australia compared to the prices offered in the U.S. I have been looking at Humminbird in particular but the price differences are across all makes and models. I feel the problem exists in Australia due to there being only one wholesaler with the rights for distribution of Humminbird in Australia.

Name: Phil Festa

Thank you
Phil Festa
