

SL

Dear RA Committee

This very short submission is to urge you not to "water down" (ha! pun intended) the current draft plan when it comes to ensuring adequate water allocations for the environment. Please do not bow to the self-interested, vocal minorities who are calling for business-as-usual allocations for irrigators. There have been decades of mismanagement and over-allocations to riparian and other landholders, to the absolute detriment of the river system. You have a wonderful opportunity to help rectify those years of neglect. Please ensure the science is followed and sufficient, permanent allocations are assigned to the rivers and their wetlands. A dead river system will serve noone. In particular, please ensure adequate water is permanently assigned to save the Coorong and associated wetlands.

Sincerely

Glenn Osboldstone
