

LIST OF RECOMMENDATIONS

Recommendation 1

4.85 The committee recommends the extension of this inquiry into the effectiveness of the Aged Care Quality Assessment and accreditation framework for protecting residents from abuse and poor practices, and ensuring proper clinical and medical care standards are maintained and practised.

Recommendation 2

4.88 The committee recommends that in the current aged care oversight reforms being undertaken, all dementia-related and other mental health services being delivered in an aged care context must be correctly classified as health services not aged care services, and must therefore be regulated by the appropriate health quality standards and accreditation processes.
