Recommendations

Recommendation 1

2.11 The committee recommends that interoperability of narrowband voice radiocommunications between federal, state and territory emergency service organisations is achieved as soon as practicable and that all services attending major incidents be compelled to maintain a common emergency communications platform to ensure seamless real time communication from and to the Incident Controller.

Recommendation 2

2.50 The committee recommends the Commonwealth Government allocate sufficient spectrum for dedicated broadband public protection and disaster relief (PPDR) radiocommunications in Australia.

2.51 The committee further recommends that any allocation of broadband spectrum to emergency service organisations (ESOs) for PPDR must be provided on the basis of interoperability amongst Australian ESOs and with ESO counterparts overseas.

Recommendation 3

3.63 The committee recommends that the Commonwealth Government together with national, state and territory emergency service organisations and radio and television broadcasters, develop a secure database of up-to-date contact details for key personnel to be used during an emergency.

Recommendation 4

3.69 The committee recommends the Commonwealth Government require guaranteed access to emergency call services for people with a disability at all times.

Recommendation 5

3.81 The committee recommends emergency service organisations in collaboration with television and radio broadcasters, the print media and other relevant organisations, use regular and ongoing public education well in advance of an emergency situation as an opportunity to teach the public about their responsibilities during an emergency and how they can appropriately prepare themselves for such an event.
Recommendation 6

4.33 The committee recommends the government consider granting public broadcasters priority access to fuel during times of emergency for the purpose of broadcasting emergency warnings and information, and in a way that does not impede the ability of emergency service organisations to access fuel.
