

THE SENATE

**ENVIRONMENT AND COMMUNICATIONS REFERENCES COMMITTEE**

5 May 2015

**The performance and management of electricity network companies:  
Second interim report**

On 2 October 2014, the Senate referred an inquiry into the performance and management of electricity network companies to the Environment and Communications References Committee.

On 20 April 2015, the committee presented an interim report that addressed many of the key issues canvassed during the inquiry. However, the committee required additional time to consider particular instances where the conduct of network service providers was questioned. The committee requested an extension to 5 May 2015 to present its final report.

The committee is still considering the evidence it has received regarding certain conduct. Accordingly, the committee requests an extension of time until 5 June 2015 to report.

Yours sincerely

Senator Anne Urquhart  
**Chair**
