24 February 2017

Senator Chris Back
Chair – Senate Standing Committee on Foreign Affairs, Defence and Trade (Legislation)
PO Box 6100
Senate
Parliament House
CANBERRA ACT 2600

Chair
Dear Senator Back,

At the Supplementary Budget Estimates hearing of 19 October 2016, Defence agreed to provide the Committee with a summary of progress made against the recommendations made by the First Principles Review team and to provide a summary of progress to support integration of Australian industry as a Fundamental Input to Capability. Defence undertook to provide this information ahead of future estimates hearings.

First Principles Review

The First Principles Review recommended a two year implementation program. To date, 46 of the 75 recommendations made by the review team have been implemented. A summary of the recommendations' implementation progress status is attached for circulation among the committee members.

For further information about this matter, my departmental point of contact is:

Mr Darren Box
First Assistant Secretary, Governance and Reform

Industry as a Fundamental Input to Capability

Since the release of the Defence Industry Policy Statement on 25 February 2016, Defence has made substantial progress to integrate Australian industry as a Fundamental Input to Capability. A summary of Defence's progress to date is enclosed for the Committee's information.

Two key Defence Industry Policy Statement initiatives – the Centre for Defence Industry Capability and the Defence Innovation Hub – were launched on 5 December 2016. These are critical drivers of Australian industry as a Fundamental Input to Capability. Defence has also strengthened the Australian Industry Capability Program, with new requirements for tenderers to show how they will maximise Australian industry involvement.

For further information about this matter, my departmental contact is:

Ms Kate Louis
First Assistant Secretary Defence Industry Policy

FPR: Recommendation Tracking as at 10 February 2017

Summary of progress to integrate Australian industry as a Fundamental Input to Capability

The integration of Australian industry as a Fundamental Input to Capability (FIC) will ensure Defence fully considers the industrial capabilities and the capacity of Australian businesses to deliver Defence capability. It is the explicit recognition by Government and Defence of the significant contribution that defence industry makes to Defence capability.

Full implementation of the Defence Industry Policy Statement (DIPS) and the integration of Australian industry as a FIC require sustained engagement and will be achieved through a combination of initiatives. Australian industry as a FIC is being institutionalised across the Capability Life Cycle and broader Defence policy and planning.

Strategic planning of the industry base

- Defence is developing the Defence Industrial Capability Plan (the Plan) and Sovereign Industrial Capability Assessment Framework. The Plan will provide the vision for the development of Australian defence industry over the next decade and beyond.
- In parallel, Defence is reviewing its industry and youth assistance programs to update its industry skilling and Science, Technology, Engineering and Mathematics support strategy to ensure the defence industry is able to access the workforce it needs to deliver the Integrated Investment Program.
- Defence is also developing a defence export strategy to actively plan, guide, and measure defence export outcomes, supporting our foreign and trade policy, defence industry and defence capability objectives.

Integrated business processes

- Defence is embedding cultural change through the Capability Life Cycle:
 - The Capability Life Cycle includes requirements for industry to be involved early and as a key partner in the delivery of Defence capability.
 - Industry is one of the core Smart Buyer design categories to ensure it is considered whenever a project strategy is being developed.
 - Industry and innovation have been integrated into the Force Design Cycle.
- The Australian Industry Capability Program has been strengthened with new requirements for tenderers to demonstrate how they will maximise Australian industry involvement, deliver an enduring industry capability and enable technology transfer and global supply chain opportunities.

The Centre for Defence Industry Capability (CDIC) and the Defence Innovation Hub

- The CDIC and the Defence Innovation Hub were launched on 5 December 2016 and are key drivers of Australian industry as a FIC.
 - The CDIC is the focal point for a range of business development, skilling and global supply chain services for small and medium enterprises.
 - The Defence Innovation Hub will invest in maturing and advancing technologies that can deliver better defence capability outcomes for Australia.
- Defence is working to establish the Next Generation Technologies Fund to invest in strategic technologies that have the potential to deliver game-changing capabilities.
