

Question on notice no. 270

Portfolio question number: SQ23-005093

2023-24 Supplementary Budget estimates

**Rural and Regional Affairs and Transport Committee, Infrastructure,
Transport, Regional Development, Communications and the Arts Portfolio**

Senator Bridget McKenzie: asked the Airservices Australia on 2 November 2023—

(1. Although the La Perouse community were encouraged to understand that the new SID was to address their particular concerns of increased noise, Airservices have stated to SACF that this modified procedure is being introduced for safety reasons 'to increase altitude requirements to climb above arrivals using the MARLIN Standard Arrival Route'. Why is this increased altitude requirement needed and at what point in the departure procedure is this increased altitude required?

2. Will jet aircraft using the new SID be passing La Perouse at higher altitudes than before, or will they be using increased engine thrust when passing La Perouse to achieve the increased altitudes required later on and therefore generate more noise impacts for La Perouse?

Answer —

QUESTION ON NOTICE

Supplementary Budget Estimates 2023 - 2024

Infrastructure, Transport, Regional Development, Communications and the Arts

Committee Question Number: 270

Departmental Question Number: SQ23-005093

Division/Agency Name: Agency - Airservices Australia

Hansard Reference: Written (02 November 2023)

Topic: AIRSERVICES - Effects of increasing altitude requirements on La Perouse residents

Senator Bridget McKenzie asked:

1. Although the La Perouse community were encouraged to understand that the new SID was to address their particular concerns of increased noise, Airservices have stated to SACF that this modified procedure is being introduced for safety reasons 'to increase altitude requirements to climb above arrivals using the MARLIN Standard Arrival Route'. Why is this increased altitude requirement needed and at what point in the departure procedure is this increased altitude required?
2. Will jet aircraft using the new SID be passing La Perouse at higher altitudes than before, or will they be using increased engine thrust when passing La Perouse to achieve the increased altitudes required later on and therefore generate more noise impacts for La Perouse?

Answer:

The increased altitude applies after the aircraft have passed through Botany Heads and will have no impacts on La Perouse residents.
