

Question on notice no. 272

Portfolio question number: SQ23-005095

2023-24 Supplementary Budget estimates

**Rural and Regional Affairs and Transport Committee, Infrastructure,
Transport, Regional Development, Communications and the Arts Portfolio**

Senator Bridget McKenzie: asked the Airservices Australia on 2 November 2023—

In Airservices Community Engagement Framework, Airservices commits to procedures that cover environmental change assessment and social impact analysis, plus community engagement in planning and implementation of new SIDs and for airspace changes. Airservices has not provided the community with information on environmental change assessment and social and noise impact analysis for the new SID for runway 16L that is to become operational on 30 November 2023. Can Airservices provide this data?

Answer —

QUESTION ON NOTICE

Supplementary Budget Estimates 2023 - 2024

Infrastructure, Transport, Regional Development, Communications and the Arts

Committee Question Number: 272

Departmental Question Number: SQ23-005095

Division/Agency Name: Agency - Airservices Australia

Hansard Reference: Written (02 November 2023)

Topic: AIRSERVICES - Environmental change assessment and social and noise impact analysis for new SID for runway 16L

Senator Bridget McKenzie asked:

In Airservices Community Engagement Framework, Airservices commits to procedures that cover environmental change assessment and social impact analysis, plus community engagement in planning and implementation of new SIDs and for airspace changes. Airservices has not provided the community with information on environmental change assessment and social and noise impact analysis for the new SID for runway 16L that is to become operational on 30 November 2023. Can Airservices provide this data?

Answer:

The new Standard Instrument Departure (SID) is being introduced for positive safety assurance. Under Airservices National Operating Standard 2.100 - *Environmental Management of Changes to Aircraft Operations* social impact analysis requirements were not triggered for the implementation of this SID, due largely to it being located over water. In accordance with the Community Engagement Framework, environmental assessment information was provided to the community via *Engage Airservices* including a fact sheet documenting the change proposal, its location, suburbs overflown, altitude and forecast noise levels.
