

Question on notice no. 133

Portfolio question number: SQ24-000236

2023-24 Additional estimates

**Rural and Regional Affairs and Transport Committee, Infrastructure,
Transport, Regional Development, Communications and the Arts Portfolio**

Senator Bridget McKenzie: asked the Airservices Australia on 22 February 2024—

- (1.How many TIBA events occurred in the past five years?
- 2.Can you please provide the date, times (hours and duration) and locations of all TIBA events that occurred over the past five years?
- 3.Please provide the details of the number of services disrupted by each event.
- 4.Please provide the cumulative total of the hours of TIBA events for each calendar year for the last five years.

Answer —

Please find answer attached

Rural and Regional Affairs and Transport

QUESTION ON NOTICE

Additional Estimates 2023 - 2024

Infrastructure, Transport, Regional Development, Communications and the Arts

Committee Question Number: 133

Departmental Question Number: SQ24-000236

Division/Agency Name: Agency - Airservices Australia

Hansard Reference: Written (22 February 2024)

Topic: AIRSERVICES - TIBA Events

Senator Bridget McKenzie asked:

1. How many TIBA events occurred in the past five years?
2. Can you please provide the date, times (hours and duration) and locations of all TIBA events that occurred over the past five years?
3. Please provide the details of the number of services disrupted by each event.
4. Please provide the cumulative total of the hours of TIBA events for each calendar year for the last five years.

Answer:

1. It is important to understand the context in which service variations occur. To ensure the safety of air navigation, a number of procedures can be applied. During these occurrences, Airservices provides an enroute published service which includes the following:

- endorsed air traffic controller - qualified to manage the given volume of airspace;
- Air Traffic Control service - a 'separation service' and an airways clearance to enter the volume of airspace and provide the required minimum distance from other aircraft;
- A Flight Information Service - provides information pertinent to aircraft operations e.g. other traffic, weather, hazards, airspace and aerodrome status; and
- an alerting service - provides advice and assistance in the event of an aircraft emergency.

When a service variation occurs (for example due to a short notice unplanned absence), the following response is activated:

- A Contingency Response Manager - an air traffic controller monitors the volume of airspace in order to provide information and alerts to pilots where needed;
- Demand Management - number of flights allowed to operate in the airspace is restricted;
- Temporary Restricted Area - all flights in the airspace must be authorised to enter and operate in accordance with route/altitude/speed and the demand management plan;

- A Flight Information Service - provides information pertinent to aircraft operations e.g. other traffic, weather, hazards, airspace and aerodrome status;
- an alerting service - provides advice and assistance in the event of an aircraft emergency; and
- Traffic Information Broadcast by Aircraft - internationally recognised procedure to maintain situational awareness.

Since the start of 2019, this process has been used on 207 events.

2. Please see **Attachment A**.
3. Each event varies the air traffic services for that location.
4. 2019: 27 hours; 2020: 114 hours; 2021: 15 hours; 2022: 211 hours; 2023: 562 hours.
