Schedule 1, after item 1, page 3 (before line 9), insert:

1A Clause 1 of Part I of Schedule 7

Omit “clauses 2 and 3”, substitute “clauses 2, 3 and 4”.

Schedule 1, after item 2, page 4 (before line 2), insert:

2A At the end of Part I of Schedule 7

Add:

Indexation of the ordinary taxable income of the taxpayer in item 1

4. The amount of the ordinary taxable income of the taxpayer in item 1 of the table in clause 1 is indexed for each year of tax after the year of tax commencing on 1 July 2006 in accordance with the CPI indexation method as follows.

The amounts specified in item 1 of the table in clause 1 are to be increased by the indexation factor worked out using the following formula:

\[
\text{Indexation factor} = \frac{\text{Sum of the index numbers for the CPI quarters for the 12 months ending on 31 March of the current year}}{\text{Sum of the index numbers for the CPI quarters for the 12 months ending on 31 March of the previous year}}
\]

where:

CPI quarter means a period of 3 months ending 31 March, 30 June, 30 September or 31 December.

index number means the All Groups Consumer Price Index number (being the weighted average of the 8 capital cities) published by the Australian Statistician.

The indexation factor is to be calculated to 3 decimal places, but increased by .001 if the 4th decimal place is more than 4.
Calculations:
(a) are to be made using only the index numbers published in terms of the most recently published reference base for the Consumer Price Index; and
(b) are to disregard index numbers that are published in substitution for previously published index numbers (except where the substituted numbers are published to take account of changes in the reference base).

If an amount worked out under the formula is not a multiple of $5, the amount is to be rounded as follows:
(c) if the amount exceeds the nearest lower multiple of $5 by $2.50 or more —round the amount up to the nearest higher multiple of $5;
(d) in any other case—round the amount down to the nearest lower multiple of $5.

Indexed amounts for each year of tax must be notified in the Gazette before the commencement of that year.

Debate ensued.

Question—That the amendments be agreed to—put and negatived.

Senator Milne moved the following amendments together by leave:

4 Appendix of improved depreciation arrangements
The improved depreciation arrangements specified in Schedule 5 of this Act apply when findings of mandatory energy efficiency opportunities assessments required by Part 6 of the Energy Efficiency Opportunities Act 2006 are implemented as specified in item 3A of Schedule 5 of this Act.

Schedule 5, page 13 (after line 1), before item 3, insert:

2A After section 40-70
Insert:

40-71 No entitlement to improved depreciation unless energy audit findings implemented
The provisions providing for improved depreciation arrangements in Schedule 5 of the Tax Laws Amendment (Personal Tax Reduction and Improved Depreciation Arrangements) Act 2006 do not apply to a corporation required to register in accordance with Part 6 of the Energy Efficiency Opportunities Act 2006 unless that corporation has implemented the findings of an energy efficiency opportunity assessment required by Part 6 of the Energy Efficiency Opportunities Act 2006.

17 ENVIRONMENT—NUCLEAR WASTE REPOSITORIES

Senator Milne, pursuant to notice of motion not objected to as a formal motion, moved general business notice of motion no. 442—That the Senate—

(a) notes that:

(i) in 2001, the United States (US) Environmental Protection Agency (EPA) established radiation standards for the proposed Yucca Mountain nuclear waste repository, setting a dose limit of 15 millirem per year for the public outside the site for a period of 10 000 years after closure,

(ii) the standards were challenged in the Federal Court which found the timeframe of the EPA’s standards was inconsistent with the recommendations of the US National Academy of Science,

(iii) in 2005 the EPA proposed a revised rule of two dose standards that would apply after closure of the site, namely 15 millirem per year for the first 10 000 years and 350 millirem per year for the period between 10 000 to one million years, and

(iv) the revised standards require the Department of Energy to demonstrate Yucca Mountain can safely contain wastes, considering the effects of earthquakes, volcanic activity, climate change and container corrosion, for over one million years;

(b) recognises that establishing regulations that apply to the next one million years is absurd; and

(c) opposes and condemns the development of such nuclear waste repositories on Australian soil.
