## Murray River Basin Plan Submission

Not once have I heard anyone acknowledge that if it had not been for the ~~DAMS~~ the rivers would have been just water holes during the drought.

Not only the environment & irrigators would have suffered but towns & cities would have been decimated.

We need move dams — expensive — Yes  
But superannuation funds would be much better spent on dams than Investment programs. have proved.

Show some vision. — "The Snowy Scheme"

Yours sincerely  
Dean Stinson
