

Standing committee on Regional Australia. 24 /1 /2011

The water act got off on the wrong foot when with all due respect to then PM. John Howard, section 52 of The Aust Constitution was wrongly used to take Federal control of water from The States, giving the environment a place ahead of humanity, community and all of mans needs.

The MDBA and their plan has been out of step ever since and is continuing Out of step with Rural and City Aust and needs to be scrapped before food producing communities are completely ruined.

Yours truly,
David.J.Lindsay.
