Inquiry into IT Pricing

Please find screenshots of an online bookkeeping system clearly displaying a large price variance between the US 'version' and the identical AUS version.

Changing the currency drop down box results in the two different screens.

Note that payroll IS included in the US version but is not shown in the \$29.00 panel.

I have recently switched to this product and while a very good one am mystified as to why there is such a difference.

Sincerely,

Tim Greig
