

NO BRIDGE!

I work at Canberra Yacht Club. Everyone who works at CYC and YMCA yacht club believe that this bridge should not be put up.

By putting up this bridge you're separating the lake into sections. Due to the height restrictions that you will be imposing on this bridge you're not allowing any boats, dinghies, and ferries under. Therefore, you are putting out businesses from CYC onwards as no one will want to sail on this part of the lake.

Children love sailing up to the fountain, and tour groups enjoy taking the ferry ride up to the fountain and beyond.

Why would we bother putting up a walking bridge right next to an already existing bridge that provides a walking path?

Why would we bother paying money to set up this bridge when it will most likely be grafittied and destroyed anyways?

So please with all these negatives DON'T put up this bridge. You will be making alot of people very unhappy.

Thank you for considering my proposal.
