Question: E10-292

OUTCOME 4: Aged Care and Population Ageing

Topic: DAY THERAPY CENTRES

Written Question on Notice

Senator Fierravanti-Wells asked:

In relation to the Day Therapy Centres, please provide details including:

- a) Where they are located?
- b) The program pursuant to which they are funded?
- c) How are they funded?
- d) Does the Government intend to cease funding of the centres and if so, when will that occur?
- e) The contractual obligations of the recipients?
- f) Any statistical information available regarding the users of the centres?

Answer:

- a) 149 Day Therapy Centres are funded by the Australian Government nationally. Their locations are listed at Attachment A.
- b) Day Therapy Centres are funded under the Day Therapy Centre Program which is within Program 4.4: Community Care. The department provided \$36.0 million in funding in 2009-10. In 2010-11 the program budget is \$37.1 million.
- c) The Program was established in 1998 under a competitive tendering process which has continued via select tendering and extensions of funding through deeds of variation. Current services were funded through a select tendering process in late 2009.
- d) The Government has not made a decision to cease funding of the Day Therapy Centre Program.
- e) The contractual obligations of service providers under the Day Therapy Centre program are to provide specified therapy services to both frail older people living in the community, and to residents of aged care homes. The therapies provided to clients must aim to optimise their independence to allow them to remain in the community or in low level residential care. Funding agreements with providers have been established and are managed consistent with the requirements of the Commonwealth Grants Guidelines.
- f) The Department of Health and Ageing Annual Report 2009-10 reports that 160,026 clients received DCT services in 2008-09. A breakdown of services and clients against this figure is at Attachment B.

**Notes**

1. Non-Therapy services are services provided for clients such as transport, food and laundry etc.

2. The number of clients per year is not simply a function of the number of clients per month. There are a significant number of regular clients within the monthly average figure.
