**Question No:** 223  
**Hearing:** Additional Estimates  
**Outcome:** Agency  
**Programme:** Clean Energy Regulator  
**Topic:** Accredited wind farms  
**Hansard Page:** N/A  
**Question Date:** 8 February 2016  
**Question Type:** Written

**Senator Back asked:**

1. Would you please provide a full list of power stations with wind as the power source that have been accredited by the Clean Energy Regulator, including the date and the name of the nominated person at the time of accreditation? Please include all changes of nominated persons to date and the dates on which these changes occurred. Please also include the date that the application for accreditation was made.
2. Would you please add to the above list whether each of these power stations have generated Large-scale Generation Certificates and how many have been generated to date? (or to a recent date for ease of calculation).

**Answer:**

Table A (set out below) lists all the accredited power stations that use wind as the eligible renewable energy source, the nominated person for the power station, its accreditation code, accreditation start date and the Large-scale Generation Certificates (LGCs) created by the power station before 25 February 2016.

Table B (also set out below) details the changes for the nominated person and the date of effect for those changes.

The term 'nominated person' is defined in section 5 of the *Renewable Energy (Electricity) Act 2000* to mean a person who has applied for accreditation – or anyone subsequently approved by the Regulator to be the 'nominated person' for the power station. In practice, the term usually refers to the company that owns or operates the power station, not an individual (Section 2C of the *Acts Interpretation Act 1901* refers).
