**Question No: 14**

**Program No. 1.1**

**Hansard Ref: Written, 3/6/2015**

**Topic: NBN Fibre Network**

**Senator Urquhart, Anne asked:**

As of the most recent date for which NBN has data available:

- a. What is the current AVC profile for customers on NBN Co's fibre network?
- b. What is the average peak speed for customers on the NBN fibre network?
- c. What is the average data usage (GB/month) for customers on the NBN fibre network?

**Answer:**

The Department has the following information provided by NBN Co:

- a. The current fibre speed mix is:

100/40	18%
50/20	4%
25/10	1%
25/5	41%
12/1	35%

- b. Average provisioned maximum download speed for fibre customers on the national broadband network is 35.2 Mbps.
- c. The last full analysis of data volumes was conducted in April. Average traffic per user was 97GB, of which 82GB was downloads.
