

Senate Standing Committee on Environment and Communications

Answers to Senate Estimates Questions on Notice

Supplementary Budget Estimates Hearings October 2015

Communications Portfolio

nbn

Question No: 105

nbn

Hansard Ref: Written, 22/10/2015

Topic: FSAMs

Senator Urquhart, Anne asked:

For the 138 FSAMs listed in the table at Attachment 3:

- (a) How many premises are in these FSAMs in total?
- (b) How many premises have an active service, in total? (please indicate whether any of these active services are FTTB rather than FTTP, and if so, how many)
- (c) How many premises that do not have an active service have an order placed to get a service, in total?
- (d) What is the AVC profile (i.e. how many premises have taken up each available speed tier, in total)?
- (e) Please provide the information sought in (a) through (d) above for each of these 138 FSAMs.

Answer:

- (a) There are 309,955 premises across the 138 FSAMs
- (b) There are 223,225 premises with an active service, of which 124 are Fibre to the Basement (FTTB).
- (c) Pending orders total 4,080.
- (d) **nbn** provides AVC profile data publicly at each quarterly results announcement and in its Corporate Plan (refer page 64 of the **nbn** Corporate Plan 2016).
- (e) **nbn** does not provide this level of detail and to do so across 138 FSAMs would be an unnecessary diversion of resources.
