QoN Number	Question Submitted By	Group Responsible	Subject	Full Question Text	Spoken/Written	Proof Hansard Page	Question Date
				Senator KIM CARR: I wonder if you could provide on notice the remuneration for ANSTO's executives,

Al-1	Carr, Kim	ANSTO	Remuneration for ANSTO Executives	Ms Beauchamp: We can provide that on notice, yes.	Spoken	52	2/03/2017 0:00
				of the new beamlines? Dr Paterson: The evaluation of the seven beamlines which have been agreed			
				with the community is \$114 million. We think that within that envelope, depending on how technology			
				is developed, we might be able to secure an eighth beamline, so that is the quantum. The process, as			
				you may recall, is that we will go to the community for that fundingâ€"state governments, the New			
				Zealand government, universities, medical research institutes and publicly funded research agencies.			
				Senator KIM CARR: What are the time lines in that? that we can make some earlier announcements			
				based on earlier commitments. Discussions in relation to those commitments have progressed in a			
				series of meetings, and we are now formalising that process to request funding specifically from			
				different institutions based on those discussions. Senator KIM CARR: So how soon do you need to			
				actually have that money? It has been put to me that you actually need to raise about \$20 million by 30			
				June? Dr Paterson: I think it would be useful to secure that level of funding by that time but it is not			
				absolutely necessary. It is a seven-year programs, so the cash flow over the program will obviously be somewhat front-end loaded because of procurement requirements. It is intended to have those			
				discussions to incentivise our community to make the commitments in a way that will meet the			
				requirements of the program. Senator KIM CARR: How many have actually committed to date? Dr			
				Paterson: In terms of formal written commitments, we do not have commitments at the moment but			
				we have got some indicative commitments from, I think, six universities and one publicly financed			
				research agency, and an indicative discussion has taken place with the New Zealand government.			
				Senator KIM CARR: Is that the extent of your consultations, the six universities? Dr Paterson: My team			
				has had other discussions. I think there has been a set of meetings that have been held with the			
				Victorian government. I understand that most of the universities, which are significant users, will have			
				had at least a face-to-face discussion to outline the scope of the program. Senator KIM CARR: So how			
				many additional universities are there, over the top of the six? Dr Paterson: The top universities using			
				the synchrotron include the group of 8 plus about six other universities that, because of the history of			
				their involvement with synchrotron related techniques, are significant users. Senator KIM CARR: Could			
				you take on notice to name them? Dr Paterson: We will provide a list. Senator KIM CARR: Have you			
AI-2	Carr, Kim	ANSTO	Synchrotron	approached the CSIRO? Dr Paterson: I will take that on notice. I am not sure if we have had a formal	Spoken	52-53	2/03/2017 0:00
				Senator KIM CARR: What is the nature of the conversations with the Department of Finance concerning			
				this particular facility? Ms Beauchamp: Our objective is obviously to have it on a sustainable			
				governance model, an operational model, and we are looking at a number of options with the			
				Department of Finance. Senator KIM CARR: They are not finalised? Ms Beauchamp: No. Senator KIM			
				CARR: When do you anticipate that ANSTO can have some certainty about this matter? Ms Beauchamp:			
AI-3	Carr, Kim	Corporate	Nuclear Medicine Facility	I would have to take that on notice.	Spoken	54	2/03/2017 0:00
				Senator KIM CARR: Yes, he has. In regard to the National Research Infrastructure Roadmap, what has			
				been your contribution in regard to the development of that road map? Dr Paterson: I was appointed			
				as a member of the expert working group and I attended a number of the consultations that took place			
				around the country. I have also been involved in the discussions that took place between the members			
				of the expert working group and in reviewing drafts of the first document, which was issued in			
				December, and then, subsequently, reviewing the responses and assisting with the further			
				development of drafts from the road map process. Senator KIM CARR: The reactor was built 10 years ago. Has there been some discussion about the need for a neutron beam guide hall for the facility at			
				Lucas Heights? Dr Paterson: Yes. Senator KIM CARR: Where does that stand in regard to the road map?			
				Dr Paterson: In the published road map in December, it does identify the second beam hall as one of			
				the research priorities for the future for infrastructure. The detailed timing of that is not indicative in			
				the document but it is identified for that investment. Senator KIM CARR: You say it is vital. Is that a bid			
				you are engaging with government on? Dr Paterson: The second neutron beam hall should really in my			
				mind be built during the second decade of operation of the reactor. That is the optimal timing. We still			
				have room for a small number of instruments in the current beam hall, but there are important			
				developments in neutron optics and this is a moving field which develops internationally and also we			
				have some very strong local capabilities. To expand the services to Australian, regional and			
				international scientists in the course of the next decade would be really important and we have			
				indicated that the planning phase needs to be kicked off in the next couple of years. Senator KIM CARR:			
				What sort of money are we talking about? Dr Paterson: I will take that on notice because there are			
			National Research Infrastructure	indicative amounts in a number of areas and I would like to be sure that we give you a number that is

				School Code Williams of Comme in Direction in Street Code Volume in Street Code			
				and I were trying to establish what percentage of current isotope production is for domestic use,			
				strictly within Australia, and what percentage is for the global market, including near neighbours like			
				New Zealand and South Korea. I am trying to establish what percentage of our current isotope			
				production is used domestically and what percentage is sold overseas. Dr Paterson: The production of			
				isotopes as it leaves the facility at Lucas Heights allows us to determine the relative amounts that go to			
				different jurisdictions but, because of the different travel times, different amounts are actually finally			
				deployed in those jurisdictions, because of the decay effect. We would be very happy to provide you			
				with an end-of-production number for the facility as a whole but, because of the fact that this is a real			
				market with real prices and real volumes, we would really not be in a position to disaggregate that into			
				too much detail, because it would have implications for the market. Senator LUDLAM: Is it because you			
				do not knowâ€"that is, you are selling to third parties who then may or may not export itâ€"or is it			
				because you do know and are unwilling to put that to this committee? Dr Paterson: We make estimates			
				but we do not publish those estimates, because those estimates have got market relevance for other			
				actors. Senator LUDLAM: I thought markets required all participants to have a reasonable amount of			
				information so they could function properly and set prices. Dr Paterson: When we meet in the High-			
				level Group on the Security of Supply of Medical Radioisotopes in Paris, that is the positon that ANSTO			
				takes. Unfortunately, that transparency has not yet come through to this market. But we are firm			
				believers that, as that transparency comes forward and as there is agreement about how those			
				proportions are disclosed, we will be in a position to disclose them. So we share a common view that			
				there should be more transparency in this market Senator LUDLAM: Sorry, I might have missed a step.			
				Who is it in Paris who says that we cannot do this? Dr Paterson: The High-level Group on the Security of			
				Supply of Medical Radioisotopes is a multi-country negotiating forum that looks at how we move this			
				from being a subsidised market to being a true market with the appropriate rules of market			
				transparency. Senator LUDLAM: How can we be sure that cartel-like behaviour is not occurring if we			
				are not given any information about how prices are set? Dr Paterson: There is a voluntary disclosure			
				process. At the moment, two countries fully disclose where they are with the production side. One is			
AI-5	Ludlam, Scott	ANSTO	Isotope Production	South Africa and the other is Australia. Senator LUDLAM: So we do know or we do not know how much	Spoken	55-56	2/03/2017 0:00
				Senator LUDLAM: Yes, if you could. My next question, which might end up falling into the same			
				category, is about your future estimated production from the proposed building 54 plant. Assuming			
				Australia's demands are not likely to change dramaticallyâ€"and tell me if that is not the present			
				trendâ€"then what percentage would be used domestically and what would be sold for export? Dr			
				Paterson: I will take that on notice. Senator LUDLAM: Present production and potential future			
				production. The synroc plant, I understand, has been licensed. Construction was due to begin in 2015.			
				Can you give us an update of what is happening there? Dr Paterson: Yes. I have briefed this committee			
				on that. The time scales for the synroc plant are not the driving force for this project; it is the			
				engineering maturity. Senator LUDLAM: When did you brief this committee? Dr Paterson: We will draw			
AI-6	Ludlam, Scott	ANSTO	Proposed Building 54 plant	the record. It is about a year ago, I think.	Spoken	56	2/03/2017 0:00

				Mr Seymour: I am very pleased to report that we have a new investigations model, and we started implementing the model from October last year. That new investigations model is designed to bring the time lines down closer to the 155 statutory calendar days in the act, and also it is balanced against the need, as I said earlier, to ensure procedural and substantive fairness to all the parties through the investigation. So the new investigations model is live and is working extremely well. There is a raft of information that I have taken the international Trade Remedies Forum members through, which is industry, unions and government, on the detail of that new investigations model, and I am more than pleased to share that information with senators if that is required. It goes to the very detail of how we go about the practice regime of investigating the allegation of dumping, both here and abroad. It is designed around the need to get better information earlier into the system so that we are in a position to be more informed and to act more quickly in making our deliberations, the first of which is the most important one, which is a day 60 preliminary affirmative determination by me to take securities, where I believe that a prima facic case has been made that dumping has actually occurred. I am pleased to say that that is working extremely well. That was an amendment that was made two years ago by the government in a direction to me that I would have to do that on day 60 in every case and have a very good reason not to. That is working extremely well and is supported fully by this new investigations model. I have examples, if senators are interested, in terms of how that has moved the			
AI-9	Carr, Kim	Anti-Dumping Commission	New investigations model	securities— Senator Kim Carr: Perhaps I could get, on notice, the examples and the other supporting information.		60	2/03/2017 0:00
				Senator XENOPHON: Mr Seymour, I have two questions. Can you advise how many applications from SME industry applicants have resulted in the publication of a dumping and/or countervailing duty notice since July 2013? I am not sure whether you want to take that on notice or have a stab at it now. Mr Seymour: If you would not mind, I will take that on notice. Senator XENOPHON: Sure. Further, can you advise how many applications from SME industry applicants have been terminated, including any part termination of investigations? Finally, are you looking at a ministerial directive on material harm to make sure that, when dumpers make choices about where they dump, they do not come anywhere near Australia? In other words, so that, if other countries tighten up, Australia does not turn into a dumping ground as the softest target or the weakest link in terms of goods being dumped here. Mr			
Al-11	Xenophon, Nick Carr, Kim	Portfolio Policy and Innovation Strategy Portfolio Policy and Innovation Strategy	SME Industry Applicants Reviewing the Functions of the Anti- Dumping Review Panel	Semator KIM CARR: On page 5 of the APRA letter, you note the recommendation about reviewing the functions of the Anti-Dumping Review Panel, and that of course does not appear in the August letter. Is the government still pushing to have a fee for producers accessing the review panel? Is that still government policy? Ms Beauchamp: We have not put any further advice up to the minister on that. Senator KIM CARR: This was a matter defeated in the Senate. Ms Beauchamp: Correct. Senator Sinodinos: I have not seen anything since I have been minister. Senator KIM CARR: This is a fee of up to \$10,000 for users. I am just wondering what the formal position is. Do you want to take that on notice? Senator Sinodinos: Yes, but, since it was defeated, I cannot see it coming back any time soon. Senator KIM CARR: I am pleased to hear that. As you know, there are a number of 'zombie measures' in the Senate. Senator Sinodinos: The Minister for Finance does not like them being referred to as 'zombie measures'. Senator KIM CARR: Yes, but he is not in the Senate, is he? Senator Sinodinos: No; he is: Cormann. Senator KIM CARR: The question then is whether or not it remains as part of the government's assessment for the future. That is why I am asking the question in that regard. Senator Sinodinos: We will take that on notice.	Spoken	63	2/03/2017 0:00 2/03/2017 0:00
Al-12	Hume, Jane	Anti-Dumping Commission	International Trade Remedies Forum	CHAIR: My question is a little long and so I will put it on notice. It is about the International Trade Remedies Forum and the three subcommittees under that forumâ€"the SME access subcommittee, the compliance and anticircumvention subcommittees and the subsidies subcommittee. I would like to know the purpose of each of those subcommittees; when each subcommittee was established; the names of the members of each subcommittee; details of when they have met; and the agenda items for those meetings. If you could take that on notice, it would be terrific. Mr Seymour: I am more than happy to do so.	Spoken	65	2/03/2017 0:00
Al-13	Ludlam, Scott	CSIRO	Coal Seam Gas Cleaner than Coal	Senator LUDLAM:I will pick up on one particular example and shine a spotlight on our maybe differing interpretations of public good. You will have seen media reports in recent days disputing the claim that coal seam gas is any cleaner than coal once you include the total leakage from wells, pipes and other equipment. Tim Forcey from the Melbourne Energy Institute at the Uni of Melbourne has been using a forward-looking infrared or FUR video recorder to directly observe methane leaking out of wells. Are you familiar with that the report, firstly?	Spoken	67	2/03/2017 0:00

Al-14	Ludlam, Scott	CSIRO	CSIRO Research into Fugitive Emissions	Senator LUDLAM: Can you provide a quick update for us on the Department of the Environment and Energy funded CSIRO research into fugitive emissions, which I think was intended to help us assess the true climate impact of CSG. I do not know whether this would be your bag or not. Dr Mayfield: I would have to you take that on notice. Senator LUDLAM: I just wanted to know how much money is left in the pot. My understanding was thatâ€"and, again, correct me if this is incorrectâ€"it was \$190,000 two years ago. Is any of that left in the tin? Dr Mayfield: I am not familiar with that, so I will have to take it on notice.	Spoken	68	2/03/2017 0:00
			Water Treatment Infrastructure	Senator LUDLAM: Does your work look at water treatment infrastructure? Dr Mayfield: I would have to take that on notice. I know there is water related research going on, but I will have to check on the actual facts there. Senator LUDLAM: Ensisionsåe("ike, environmental fugitive emissionsåe" are the focus of the rest of my comments. If you are trying to look at life-cycle emissions of the whole infrastructure and the whole supply chain, I would have thought water treatment infrastructure would be part of the work. Dr Mayfield: It would be part of it in looking at the emissions from a wellhead. Senator LUDLAM: And water treatment infrastructure. Dr Mayfield: Yes. Senator LUDLAM: If you do not have all of this at the table, feel free to take any of these on notice. What about decommissioned wells or old wells? Dr Mayfield: That would also be part of the scope. I do not believe that there are many wells at this point in time that have been decommissioned but, certainly over time, you would want to monitor that. Senator LUDLAM: What is the sample size of phase 2? How much are you able to directly observe before you start your process of extrapolation? Dr Mayfield: I probably would have to take the question on notice. I am not sure that I understand the question. Senator LUDLAM: The infrastructure in Queensland at least, and elsewhere on the east coast, is extensive. It is a big industry; it was growing very rapidly for a period of time until it started to hit the wall. How many of these installations can you directly observe before your PhDs start extrapolating the total estimated impact? Dr Mayfield: I do not know the specific answer to that question but I do know that the original study looked at 43 wells to date and there is ongoing work. Senator LUDLAM: How many decimal places is that going to run to? Dr Mayfield: No, I do not know. Senator LUDLAM: How many decimal places is that going to run to? Dr			
AI-15	Ludlam, Scott	CSIRO	Water Treatment Infrastructure	Mayfield: I do not know that as a percentage but, again, I can take that on notice.	Spoken	68-69	2/03/2017 0:00
Al-16	Ludlam, Scott	CSIRO	CSIRO Governance Arrangements	Senator LUDLAM: Given that it is industry partly funding your research and directing its priorities, how do you dealâe"not with the appearance of conflict of interestâe" with the reality that industry probably does not want the work that it is funding to conclude that industry is, in fact, dirtier than coal. What do you do when your findings are inconvenient to the people who are funding the work? Dr Mayfield: CSIRO is employed to do the science on the work. We report the science facts that we measure and identify. There is no impediment to that. There are very rigorous governance arrangements around the GISERA work, and I am very confident that those arrangements are very robust. Senator LUDLAM: We are out of time. If you could then, on notice, provide us with what those governance arrangements are, if they are not already in the public domain. Dr Mayfield: We would be happy to.	Spoken	70	2/03/2017 0:00

				SCHOOL AND GENERAL SERVICE AND SHOW, HAVE SEEN PAISABLE THE GREEK OF CHECKING FOR THE COLUMN TO CHECKING FOR THE COLUMN THE COLUMN TO CHECKING FOR THE COLUMN THE COLUMN TO CHECKING FO			
				number of committees. The secretary has been good enough to provide the information in regard to			
				ANSTO, and I would ask the same guestion in regard to the CEO of the CSIRO. What is your current			
				remuneration package? Dr Marshall: Are you asking me? Senator KIM CARR: I think the secretary may			
				wish to intervene at this point, so I amâ€" Ms Beauchamp: As I said previously, these positions are			
				covered under the Remuneration Tribunal framework as Principal Executive Offices. I should say that			
				the head of CSIRO it is actually part of the Principal Executive Office class E. I will just get it right, seeing			
				as I gave you incorrect advice earlier. Dr Marshall's remunerationâ€"the advice was sought from the			
				board of the Remuneration Tribunal in terms of what that should be. Under that class E, total			
				remuneration for the CEO of CSIRO is \$673,712. Senator KIM CARR: Sorry, \$600â€" Ms Beauchamp:			
				\$673,712. Senator KIM CARR: Well, that is interesting, because the last time this was published in the			
				annual report, Dr Marshall's predecessor was being paid a lot more than that. Senator Sinodinos: A lot			
				more? Senator KIM CARR: Yes, a lot more than that. I am surprised that you say it is \$673,000, because			
				schedule E of the Remuneration Tribunal, from memory, has a number of categories of offices			
				contained in itâ€"I will just find thatâ€"including the head of Australia Post, the Governor of the			
				Reserve Bank, the Deputy Governor of the Reserve Bank and the head of the ABC. They are not being			
				paid \$673,000. Ms Beauchamp: These offices are in a different category under the Remuneration			
				Tribunal framework. As I mentioned, they are categorised as Principal Executive Offices, and that table			
				of those positions that applies to this range of positions is identified on the Remuneration Tribunal			
				website. Senator KIM CARR: Is that the total package, or his salary? Ms Beauchamp: It is the total			
				remuneration. Senator KIM CARR: It is the total package? Ms Beauchamp: Yes. Senator KIM CARR:			
				\$673,000. Ms Beauchamp: Yes, with a component at risk, which is determined by the board. Senator			
				KIM CARR: So, what component is determined by the board? Is that on top of the \$673,000? Ms			
				Beauchamp: That is correctâ€"based on performance, Senator KIM CARR; So, what is that sort of			
				performance bonus? Ms Beauchamp: I think that is in the order of 30 per cent. Senator KIM CARR:			
				Thirty per cent on top of this? Ms Beauchamp: Yes. Senator KIM CARR: So, what is the total			
				packageâ€"which is the question I asked. Ms Beauchamp: The total package is as I have indicated.			
AI-17	Carr, Kim	CSIRO	CSIRO CEO Remuneration	There is an at-risk component based on performance. Senator KIM CARR: What was it last year?	Spoken	70-71	2/03/2017 0:00
				what the figure was. You have indicated in your annual report that there has been a change in the			
				number of executives. In 2015-16 there were 20 executives reported on 121 of the report. In 2012-13			
				there were 33 members. That is correct? Ms Bennett: Correct. Senator KIM CARR: Can you account for			
				the change in the numbers? Ms Bennett: Yes. In the 2013-14 year, under the definitions that were			
				required, which is leaders who essentially have influence in management control over the organisation,			
				CSIRO included the executive, the personnel who were formerly known as flagship directors and the			
				personnel formerly known as chiefs of divisions, whereas in the last annual report, in 2015-16, we			
				determined that an equivalent of that definition would have been the executive and the business unit			
				directors of the science business units. Hence the difference. Senator KIM CARR: So you have changed			
				the definition? Ms Bennett: We have not changed the definition. We believe that we are being true to			
				the definition of those who control. As you know, we do not have flagships and chiefs of staff anymore.			
				We have integrated those. Hence the difference. Senator KIM CARR: Thank you. So is it fair to say, like			
				with like, that the number of executives has changed? Ms Bennett: Like for like, we have a smaller			
				number with broader responsibilities. Senator KIM CARR: What is the difference? You say, like for like,			
				there are fewer. How many fewer? Ms Bennett: The executive team has moved down by four, and			
				therefore the balance of the 13 would be nine, which is essentially the amalgamation of the flagship			
				director and the chief of division roles into now the business unit director roles. Senator KIM CARR: Of			
				that group that have actually declined in numberâ€"that is, left the organisationâ€"how manyâ€" Ms			
				Bennett: Senator, if I may: many of the chiefs of divisions did not leave the organisation. The roles were			
				amalgamated andâ€" Senator KIM CARR: Mr Wannias did though, didn't he? Ms Bennett: A few may			
				have done, but the roles of what were then the chiefs have now become, in many instances, the deputy			
				of the business unit and they, in particular, take up a role in deep science. Senator KIM CARR: Can you			
				give me a number for who actually left? Ms Bennett: I would not be able to say which chiefsâ€" Mr Roy:			
				Just to clarify, over what period of time? Senator KIM CARR: Over the past two years. Mr Roy: We			
				would have to take that on notice. Senator KIM CARR: Can you tell me how many of those executives			
				were offered a new contract or an extension on their existing contract? Mr Roy: I am just trying to			
AI-18	Carr, Kim	CSIRO	Number of Executives	follow the question, Senator. Senator KIM CARR: How many people notified you that they wanted to go	Spoken	71-72	2/03/2017 0:00
	<u> </u>			, and the state of		. = 12	,,
				Dr Marshall: The board has the power to override any determination that I make. But as a practical			
				matter, there will be a discussion and they will want to understand whyâ€" Senator KIM CARR: Sure,			
				but that would not have happened, would it? There has been no overriding of recommendations? Dr			
				Marshall: The board do not always have the same view. Senator KIM CARR: No, but you would know in			
				the two years thatâ€" Dr Marshall: Yes, but what I am saying is that there has never been a case of the			
				board saying, 'No, you're wrong and we'll change it.' It has been more a discussion, 'Do you really think			
				this or that?' Senator KIM CARR: I see. Have there been any recommendations altered after discussion			
				with the board in your time? Dr Marshall: Yes. Senator KIM CARR: How many? Dr Marshall: A small			
				number and a small tweak to the numbersâ€" Senator KIM CARR: Can you take that on notice please?			
AI-19	Carr, Kim	CSIRO	Board Determinations	What the small number is. It should not be hard to work out if it is a small number. Dr Marshall: Sure.	Spoken	73	2/03/2017 0:00

		1	1				
				C + WHATCHER BY			
				Senator KIM CARR: Did every one of the executive team get a bonus? Dr Marshall: Yes, although I do			
				not tend to look at it as a bonus; I tend to look at it as a portion of compensation that is at risk. Senator			
				KIM CARR: However you tend to look at it, were there additional payments paid to the executive? Dr			
				Marshall: Above base? Yes. Senator KIM CARR: Every one of them? Dr Marshall: Yes. Senator KIM CARR:			
				So despite the couple of years you have had, every one of the executives got a bonus? Dr Marshall: I			
				would sayâ€" Senator KIM CARR: What I call a bonus, but you callâ€" what is your definition? Dr			
				Marshall: Portion of the salary is at risk. Senator KIM CARR: I see. They all got extra money? In the last			
				two years, all the executives have got extra money? Dr Marshall: All of the executives have received a			
				portion of the at-risk component of their salary; none of them have received all of it. Senator KIM			
				CARR: I see, so no-one has got 100 per cent of the at-risk portion? Dr Marshall: I do not believe so.			
				Senator KIM CARR: So what is the range? Dr Marshall: I would have to take that on notice. Senator KIM			
				CARR: If yours was 85 per cent, did the rest of the team come in at 85 per cent each? Dr Marshall: As			
				Mr Roy indicated, there is a component of individual KRAs, but we also base about half of the rating on			
				the overall enterprise performance KRAs. So even if an executive got a higher rank here, if the			
				organisational performance was not the same that would pull that score down. Senator KIM CARR: I			
				like to think this is a pretty straightforward matter. Most people would regard these as performance			
				bonuses. What I am interested to know is what was the percentage that each of the executives			
				received in regard to performance bonuses? Dr Marshall: I would have to take that on notice. Senator			
				KIM CARR: If you cannot provide me with individuals, the percentages in a range would be satisfactory.			
				Do you intend to publish the executive salaries in the future, not just for the CEO but for all the			
AI-20	Carr, Kim	CSIRO	Executive at-risk components of salary	executives?	Spoken	73	2/03/2017 0:00
				Senator KIM CARR: Before we get to that, can you refresh my memory? CSIRO had personnel posted			
				overseas in regard to Chile and Boeing. There were some people, I remember, in Germany as well. Mr			
				Roy: There are a small number of others, as well, in southern France. We used to be in Fraunhofer in			
				Indonesia. There are a small number of places where we have officers overseas. Senator KIM CARR: So			
				that is your overseas postings. This is on top of that? Mr Roy: Yes. Senator KIM CARR: How many people			
AI-21	Carr, Kim	CSIRO	Overseas Postings	do you have posted overseas in total? Mr Roy: We would need to take that on notice.	Spoken	74	2/03/2017 0:00
				Senator KIM CARR: The question then arises about the work of other activities like the G'day USA			
				activities. Have you sponsored an award there? CSIRO sponsored an individual award presentedâ€"			
				Senator Sinodinos: That was earlier this year. Do you mean this year? Senator KIM CARR: Is that true or			
				not? Did I get that right or have I been misinformed? Dr Marshall: I do not think we sponsored an			
				award. Senator KIM CARR: So you did not sponsor an award? Dr Marshall: I do not believe so. Senator			
				KIM CARR: So you certainly had no-one at the G'Day USA awards this year? Senator Sinodinos: You			
				mean at the big flashy functionâ€" Senator KIM CARR: It was a very flashy function. Dr Marshall: In Los			
				Angeles? Senator KIM CARR: I thought it was this year. Did you have someone there? Dr Marshall: We			
				made an announcement on the Saturday of the launch of the office, and I was at the dinner on			
				Saturday night. Senator KIM CARR: How many from CSIRO attended the dinner? Dr Marshall: I believe			
				there were two of us. Senator KIM CARR: And you had no awards? Dr Marshall: No. I left the dinner at 9			
				o'clock to fly home for my son's birthday, so I missed most of it. Senator KIM CARR: I am very pleased			
				about that, and I am sure your son will be. Dr Marshall: He is 14. He does not appreciate much,			
				unfortunately. Senator KIM CARR: Did you sponsor an award? Dr Marshall: I will take it on notice, but I			
				do not think we did. Senator KIM CARR: I will put some other questions on notice, because it is a			
				threshold issueâ€"did you or did you not? CHAIR: I think they have given their answer pretty clearly.			
				They do not know. Senator KIM CARR: There are actually surprises that flow from it. Do we have some			
				advice on that matter? Mr Roy: We will have to provide more information for you on notice. It appears			
AI-22	Carr, Kim	CSIRO	G'day USA activities	that we may have sponsored an award for the event, but I do not have the information with me.	Spoken	75-76	2/03/2017 0:00

				Senator ROBERTS: I would like to know why CSIRO has not done due diligence on the Bureau of			
				Meteorology data, and I would also like to know why CSIRO relies upon the NASA Goddard Institute for			
				Space Studies, because I have been communicating with NASA Goddard Institute for Space Studies			
				director, Gavin Schmidt. He was very quick to respond to my first letter. In his response he admitted			
				that the NASA Goddard Institute for Space Studies temperature data is the same as the NOAA data,			
				and what we have known for a while but no-one has admitted is that there have been four datasets			
				which are claimed to be independent but they are all the same dataset at heart. So CSIRO has not done			
				any due diligence on that, we were told, yet they rely on it. We want to know why. Dr Marshall: I am			
				happy to take that on notice. We have a 50-year relationship with NASA, so it should not be hard to			
				tackle. Senator ROBERTS: Their database is severely compromised and questioned, and now we have			
				just learned that a bill has been passed in the US Congress to removeâ€" CHAIR: Senator Roberts, you			
				have got to ask a question. Senator ROBERTS: Are you aware that the US Congress has passed a bill to			
				remove NASA Goddard Institute for Space Studies from studying climate and get it back to science? Dr Marshall: I was aware of that. Senator ROBERTS: I would like to know if you are going to do any more			
				due diligence or if you are actually going to start doing due diligence on the records that you use as the

				Senator KIM CARR: CSIRO, is Mr Scott Wilkie known to the organisation? Dr Marshall: Yes. Senator KIM			
				CARR: Who is he? Dr Marshall: I believe he is a gentleman who is helping Data61. Senator KIM CARR:			
				When you say 'helping', what do you mean? In what capacity is he helping Data61? Dr Marshall: I think			
				he is an industry expert in cyber. I can get Dr Williams to give you detail on that. Dr Williams: Mr Scott			
				Wilkie is a consultant, an ex-VC person, and he has been involved a little with Data61 on cyberwork for			
				some of the development there. Senator KIM CARR: Did you say he was a consultant? Dr Williams: Yes.			
				He has been a consultant in our information technology group, advising on some of the computer			
				security. But at the moment he is not employed in any form by either of them. Senator KIM CARR: Is he			
				not employed or is he still a consultant? Dr Williams: He is not a consultant in any form. Senator KIM CARR: When was the last time he was acting as a consultant? Dr Williams: I would have to take the			
				exact date on notice. Senator KIM CARR: Was it a year ago? Dr Williams: No, it was not a year ago, but it			
				was a while ago. Senator KIM CARR: More or less than a year ago? Dr Williams: Less. Senator KIM CARR:			
				So it was in the last 12 months? Dr Williams: Yes. Senator KIM CARR: Can you be more specific as to			
				what his duties were for Data61? Dr Williams: The specific duties we will give you in detail, but in			
				Data61 he actually helped in defining some of the work around cyber and he helped in defining some of			
				the work around the computing needs. Senator KIM CARR: What was the value of his contract? Dr			
				Williams: I do not know that. Senator KIM CARR: Could you provide that? The total package is what I am			
AI-24	Carr, Kim	CSIRO	Mr Scott Wilkie and Data61	interested in. Dr Williams: Yes.	Spoken	81	2/03/2017 0:00
				Senator KIM CARR: Is it possible to get the detail of his contract? Dr Williams: The ones he has had with CSIRO? Senator KIM CARR: Yes. This is after the amalgamation. Data61 is a division of CSIRO now. Dr

				Senator SMITH: My questions go to a number of articles that appeared in The Sydney Morning Herald			
				in recent times concerning the CSIRO scientific work relating to Aboriginal rock art on the Burrup Peninsula in Western Australia. Can someone help me with that? Dr Mayfield: I can answer that.			
				Senator SMITH: Dr Mayfield, are you familiar with the two articles, one on 13 February and the other			
				on 19 February? Dr Mayfield: Yes, I am aware of the articles. Senator SMITH: Would you like to make a			
				general comment about the accuracy or otherwise? Dr Mayfield: We believe that we have done the			
				appropriate sites that have been delivered to the contractor that was requested there, and we stand by			
				the science that has been done. Senator SMITH: Why should people trust your assertion that the CSIRO			
				can stand by the scientific work that you have undertaken? I do, but I am interested in convincing			
				others. Dr Mayfield: The nature of the work that was undertaken was to a scope of work with the			
				Western Australian government on protecting the Burrup rock art. We delivered to those contracts.			
				The methodologies that were applied were peer reviewed by an independent group, and we have			
				applied those with internal peer review as well. So we have applied peer review process. Senator			
				SMITH: So an internal peer review process and an external peer review process? Dr Mayfield: There is			
				external peer review from the working group that was both on methodologies and on review of results			
				published. We always do an internal review process as part of our work, anyway. Senator SMITH: Is it			
AI-26	Smith, Dean	CSIRO	Aboriginal rock art	appropriate for you to make available on notice who conducted it or the individuals who were involved in that peer review process, internal and external? Dr Mayfield: Yes, we could provide that on notice.	Spoken	83	2/03/2017 0:00

				Senator KIM CARR: Let us take the R&D tax review, since Mr Fraser is one of the authors of the report.			
				Will this group now have responsibility for that? Senator Sinodinos: The Treasury group? Senator KIM			
				CARR: Yes. Senator Sinodinos: No; because it involves taxation it is a joint matter between my portfolio			
				and the Treasury portfolio. Senator KIM CARR: So who will have responsibility for the implementation			
				of the review? Ms Beauchamp: It will be a government review, and we will work closely with the			
				Treasury and, indeed, other agencies to advise the government in terms of a response. Senator KIM			
				CARR: Will you have officers actually seconded to the unit? Ms Beauchamp: I have not looked at it yet,			
				but I think it would be a great idea if we could have secondments both ways between the Treasury and			
				us. And we have done that in a couple of areas in the past. Senator KIM CARR: Could you take that on			
AI-28	Carr, Kim	AUSI - Innovation Programmes	R&D tax review	notice Ms Reauchamn: Ves	Spoken	88-89	2/03/2017 0:00
				each landing pad case. Senator KIM CARR: I am asking about the Tel Aviv one. Ms Urquhart: Each one is			
				also tailored to the innovation environment concerned. Again, I would support the minister's			
				comments. Senator Sinodinos: It is a bit early to evaluate how effective they are going to be. Senator			
				KIM CARR: I can accept that line of argument. I am saying to you that I was surprised at how small this			
				centre was. Who actually services it? How many people? Ms Urguhart: That sort of detail could be			
				provided by Austrade. Senator KIM CARR: I did not see any Commonwealth employees there, did I?			
				Were there any Commonwealth of Australia personnel involved with this? Mr D Wilson: I could not			
				answer that. Ms Beauchamp: We will take those on notice because we will need to talk to Austrade.			
				Senator KIM CARR: And how long has it been established for? Mr D Wilson: They have all been			
				operational. It was originally announced on 8 December 2015. Senator Sinodinos: As part of the			
				NISAâ€" Senator KIM CARR: I understand that. It was announced in '15. When was it actually set up?			
				Ms Urquhart: Again, for that sort of detail, we would have to confirm with Austrade becauseâ€"			
				Senator KIM CARR: But it has been over a year, hasn't it? Ms Urquhart: No doubt there is a nuance to			
				the detail of operation. We could be talking about procurement of the property; we could be talking			
				about the start-ups arriving at the landing pad. It would be preferable if we could consult with Austrade			
				to bring you accuracy in these answers. Senator KIM CARR: I put it to you that I was there and I was led			
				to believe it had been operating for over a year, and there were eight companies in a year. How much			
				are we spending on this place? Ms Urquhart: I think we would be misrepresenting the situation if we			
				were to respond to that. I really believe we should be consulting with Austrade. Senator KIM CARR: The			
				total funding envelope is \$11 million. Is that correct? Mr D Wilson: That is correctâ€"\$11.3 million.			
				Senator Sinodinos: Over what period, though? Mr D Wilson: I would need to check that. Mr Lawson: As			
				it was announced in NISAâ€"and we will correct this if it is wrongâ€"it would have been over the forward estimates. It is also important that the announcement was on the Landing Pads program, not			
				the particular landing pads. Their locations were selected subsequently. I have visited the one in San			
				Francisco with a minister. I think that was the first one that was set up. Ms Weston: That was launched			
				in February 2016. Mr Lawson: That one is currently running through its second cohort. Senator KIM			
AI-29	Carr. Kim	Science and Commercialisation Policy	Tel Aviv Landing Pad	CARR: How many people have been through? Mr Lawson: I would have to take it on notice, but I	Spoken	90-91	2/03/2017 0:00

				pender him orders oprous, was one person, they would be running very itale, wouldn't they.			
				You have managed to get 444 in corporate and, according to this table, in national innovation and			
				science agenda, one person. Ms Beauchamp: The unit that was set up to deliver the national innovation			
				and science agenda that was announced in December 2015 consists of a number of our own staff and a			
				number of secondments from other agencies, including Prime Minister and Cabinet. I think that is why			
				there would be only one, because there is one departmental officer and a range of officers seconded			
				into that unit. Senator KIM CARR: That one person is obviously very busy. What do they actually do? Ms			
				Beauchamp: As I have mentioned, there is a delivery units around the implementation of the national			
				innovation and science agenda. Our role is to coordinate and lead progress on the delivery of the 24			
				measures of the national innovation and science agenda. So, yes, the people are very busy monitoring			
				progress against that. Mr Hazlehurst: I can slightly expand on the secretary's comments. When we			
				moved into the implementation phase for the agenda, we set up a small team, which was effectively a			
				project management team, supporting the governance of the implementation. There was a team			
				initially of about seven or eight staff, some of whom, as the secretary mentioned, were secondees. As			
				we have got further through the process of the implementation of those measures that team has			
				wound down, and there are really only perhaps two or three people in that team at the moment, but			
				that is because their primary function is not to do the actual implementation; it is around the			
				coordination of the project management. Senator KIM CARR: So there are two or three in the team, not			
				one. Mr Hazlehurst: Yes. But I think the other two are either secondees or contractors. Senator KIM			
				CARR: I see, they are contractors. Mr Hazlehurst: There might be one contractor. Senator KIM CARR:			
				What is the one contractor? This gets better all the time. Who is that? Mr Hazlehurst: I forget the			
				person's name. I am happy to take that on notice. It is simply someone who is helping with project			
				management. Senator KIM CARR: Why do we need a contractor? Mr Hazlehurst: It is someone			
				, ,			
				providing some assistance around the project management of the project. Senator KIM CARR: Project			
				management: what, you get a contract in to contract manage? Mr Hazlehurst: There are times when			
				we bring in outside assistance for project management. Senator KIM CARR: Yes, I can see that. But why			
41.20	C Ki	NICA Delivery Heit	NICA ACI	do you need a contract manager to manage the contracts? Mr Hazlehurst: It is not a contract; it is a	Carles	92-93	2/02/2017 0:00

				Constant VIA CARD, However, the NICA annual and III was a Mark Constant The buildest for the			
				Senator KIM CARR: How much was the NISA campaign, all up? Ms Beauchamp: The budget for the			
				campaign which was announced was \$28 million. Senator KIM CARR: And the amount of money spent			
				on NISA itself, how much was that? Ms Beauchamp: Sorry, Senator? Senator KIM CARR: How much is			
				being spent on NISA altogether? Ms Beauchamp: On the campaign? Senator KIM CARR: No. You have			
				told me \$28 million. Mr Lawson: NISA was \$1.1 billion over the forward estimates. I think to call it an			
				advertising campaign understates it. It was a deliberate part of NISA that there should be a change in			
				the culture of Australia and innovation. Senator KIM CARR: In the run-up to the election there should			
				be a change in the culture. Mr Lawson: It has been long said that Australian industry, Australian society,			
				needs to change the culture of innovation, that we do very well on science but not so well on			
				translating. This campaign was more than advertising the particular programsâ€"it was about changing			
				culture, which my colleagues can tell you more about. Senator KIM CARR: Given the election result, was			
				there any evaluation of the change of cultureâ€"the effectiveness that occurred for this \$28 million?			
				Ms Dove: Yes, there has been an evaluation of the campaign. Senator KIM CARR: Do you have a copy of			
AI-31	Carr, Kim	Corporate	NISA Campaign	the report? Ms Dove: I will have to take it on notice.	Spoken	93-94	2/03/2017 0:00
				Senator KIM CARR: In question No. S126 I asked about the number of programs that have been			
				discontinued since the change of government. You indicated 27 programs. Did that include programs			
				like Enterprise Connect, Commercialisation Australia and Researchers in Business? Ms Weston: Yes.			
				Senator KIM CARR: Because there are rebadged programs that are often related to the original intent,			
				does that affect the numbers at all? Ms Weston: We will need to take that on notice, but obviously			
				there were new programs that commenced as well. The question asked specifically for those that had			
				closed. So I do not think that is a net figure Senator KIM CARR: I just wanted to know whether any of			
AI-32	Carr, Kim	Corporate	Departmental programs	those had been rebadged. Ms Weston: The new programs are not rebadged old programs necessarily.	Spoken	94	2/03/2017 0:00

				Senator with artificial right has the overall badget changes, is restill oso million cards, his heighte has			
				been indexed so that the target budget for construction is 674 million euros. Delays in the project			
				recently have been around the fact that the design has been coming in at significantly above that			
				amount. I am pleased to say that, over the last three or four months, there has been a very			
				seriousâ€"and looking quite successfulâ€"cost reduction exercise. We are having a board meeting in			
				Perth at the end of this month to consider the revised, cost reduced project, and it is looking very likely			
				that we will have a construction budget under 700 million euros. So we are feeling much more			
				confident. Senator KIM CARR: Under 700 million. So we have gone from 650 million euros to 700			
				million, even with a cost reduction exercise. Ms Kelly: As I said, under 700 million euros. We are hopeful			
				of bringing it in for the 674 million euros, and we are feeling much more confident about that because			
				of recent work which has been quite effective in cost-reduction strategies. Senator KIM CARR: What is			
				Australia's role in that program? Ms Kelly: We have been leading the work on the cost-reduction			
				strategy for the low-frequency telescope, the one to be built at the MROâ€"the Murchison Radio-			
				astronomy Observatory. Senator KIM CARR: Exactly how much do you need to cut from the budget to			
				get it down to the estimated 674 million euros? Ms Kelly: I do not have the precise figure in my head,			
				but the budget was well over 800 million eurosâ€" Senator KIM CARR: Eight hundred! Ms Kelly: when			
				the board charged the office and a range of other people with, as I said, a serious cost-reduction			
				strategy. Senator KIM CARR: Eight hundred! How did it get anywhere near 800? Ms Kelly: As you know,			
				design is a very distributed exercise. There are international consortia, each of them developing work			
				packages that together make up the design. In that process various costs have blown out. We were			
				concerned that we were designing a telescope that we could not afford to build, so we have taken the			
				necessary action to bring it within the cost target. Senator KIM CARR: There are a couple of issues			
				, , , , , , , , , , , , , , , , , , , ,			
				there. The original budget was 650 million euros. You are saying that with indexation it has reached 674			
				million euros. But the other partners are proposing 800 million euros and the Australian			
				representatives have said they are not going to have that, that we are going to bring that back toâ€" Ms			
				Kelly: No, sorry, not the other partners. The SKA organisation, headquartered in Manchester, was			
				coordinating the design. The design they brought to the board was of the order of well over 800			
AI-33	Carr. Kim	Science and Commercialisation Policy	SKA Budget		Spoken	95-96	2/03/2017 0:00
	22.17						_,,
				Senator KIM CARR: It is a bipartisan position. Have there been any shortfalls or delays in the			
				commitment of funds from any of the other countries? Ms Kelly: The only two countries that have			
				formally set money aside in their budgets at the moment are Australia and the United Kingdom. There			
				is also a very strong commitment from South Africa, although it is not yet budgeted. Between us, the			
				three host countries are expected to pay between 40 and 45 per cent of the total cost. The other seven			
				countries have not made formal commitments yet, although they have informally indicated in some			
				cases what they expect to be able to contribute. Senator KIM CARR: Is this part of why we have had an			
				escalation in cost? Ms Kelly: No. Senator KIM CARR: It is nothing to do with the fact that they have not			
				actually put any money on the table? Ms Kelly: No. The escalation in cost has been more to do with the			
				design and the scientific ambition of some of the design elements. Senator KIM CARR: If you could you			
AI-34	Carr, Kim	Science and Commercialisation Policy	SKA Commitment of Funds	take on notice how we account for this escalation in costs, I would appreciate it. Ms Kelly: Sure.	Spoken	97	2/03/2017 0:00
				Schator Kill Califf. 1 Sec. Secretary, can you commit that you received a complaint from the			
				cybersecurity bid chair? Ms Beauchamp: Yes, I can confirm that. Senator KIM CARR: Thank you. Can you			
				confirm that a formal apology was issued? Ms Beauchamp: I can confirm that we went through a			
				process of review to address the complaint and the applicant has been advised. Senator KIM CARR:			
				What were the review findings? Ms Beauchamp: It confirmed what Mr Stirling said. Senator KIM CARR:			
				That you had a problem with the IT system. Was there anyone actually available in the office to receive			
				the applications? Was that part of the problemâ€"that everyone had gone home? Mr Stirling: I am not			
				aware that that was the case. Senator Sinodinos: Is that what is being alleged by the people you spoke			
				toâ€" Senator KIM CARR: There was only one formal complaint but there were others affected. How			
				many bidders were affected? Mr Stirling: I would have to you take that on notice to provide you with an			
				accurateâ€" Senator KIM CARR: Was it more than one? Mr Stirling: It was more than one. Senator KIM			
				CARR: Was it five? How many was it, roughly? I accept you are going to take it on notice to give me a			
				formal answer, but several bidders were affected by this. Mr Stirling: From memory, it was two or			
				three. Senator KIM CARR: And you are saying it was not because there was no-one there to actually			
				answer the phone? Mr Stirling: The telephone contact details that are on our application form are for			
				1 1			
				the department's contact centre, which is an outsourced service provider. That organisation answers			
				the phone from 8 am to 8 pm nationallyâ€"so it can be 10 pm or 11 pm, depending on the time			
				differenceâ€"every day of the week. Senator KIM CARR: So there were no officers available? It is an			
				outsourced call centre? Mr Stirling: There is absolutely an escalation process. I am not saying there			
				were no departmental officers available. There is an escalation process from our contact centre to a			
				range of departmental officers, depending on the issue that isâ€" Senator KIM CARR: Did that happen?			
				Was there an escalation process that actually got someone on the phone? Mr Stirling: I am not sure at			
				what point in time you are referring to. Senator KIM CARR: When it was discovered that people could			
				not make a bid within the time line. That was why you extended it, wasn't it? Mr Stirling: To facilitate			
				getting applications in in a timely manner we extended the closing time to provide more opportunity			
				for people to complete the application form. Senator KIM CARR: At the registered close, people were			
			Complaint from the cyber security bid	not able to submit; isn't that the case? Ms Beauchamp: It was fixed within the 24 hours, so people did

Al-36	Carr, Kim	AUSI - Business Services	System failure	Senator KIM CARR: The instructions that you issued to applicantsae were they anything to do with the failure of the computer system to receive these applications? Mr Stirling: No. Senator KIM CARR: What was it down to? Where was the failure in the system? Mr Stirling: I will have to take on notice the exact details so that I do not mislead you in terms of providing that. Senator KIM CARR: I know you will not want to do that butae Mr Stirling: And I will need to consult with my colleagues from our IT area to describe it accurately for you.	Spoken	101	2/03/2017 0:00
Al-37	Carr, Kim	AUSI - Business Services	Application submission	Senator KIM CARR: And is it not the custom and practice in this program for applications to come in at the end of the program? Mr Stirling: I do not think that is unique to this program. Senator KIM CARR: No, that is not unique to this program. But it is the case. It is a characteristic. You just indicated that before, in regard to the application numbers. You are not unfamiliar with this practice. The difference here was that, when they went to put in their applications, they would not be received. Is that the case or not? Have I understood that correctly? Mr Rossiter: Yes, for a small number of users. They were unable to actually submit the form. Senator KIM CARR: That is right. How many is this 'small number'? We have heard 'two or three'. Is that correct? Mr Rossiter: On the figures I have here, it was four. Senator KIM CARR: Four. How big were their applications? Mr Rossiter: Big' in what sense? Senator KIM CARR: For instance, cybersecurity. Is that a significant application? Mr Rossiter: Dollarwise? Senator KIM CARR: Yes. Mr Rossiter: That would be a question for my business colleagues. Senator KIM CARR: Can you tell me that? Mr Stirling: I will have to take that on notice	Spoken	101-102	2/03/2017 0:00
Al-38	Gara Kim	Digital Statement of Counties	CRC Degram to allocation To the second	Senator KIM CARR: Finally, Mr Rossiter, can you confirm that this is the only time that this has happened? Mr Rossiter: In the history of the CRC Program? Senator KIM CARR: Yes. Mr Rossiter: To the best of my knowledge, but I have not been involved for the entire history of the CRC. Senator Sinodinos: It is a pretty good record if that is the case. Senator KIM CARR: And that is the point. It actually points to the failure. Is it a problem with the capabilities of the department, Madam Secretary, that this has happened? Ms Beauchamp: I can tell you what was the cause of the problem. I think we need to better understand what the system issue was. We have taken corrective action to fix it. Senator KIM CARR: Will you take that on notice? Ms Beauchamp: We received all the applications within the 24-hour period after that. Senator KIM CARR: Thank you, If you could take that on notice? Mr Stirling: It is important to note that the CRC-P part of the program uses the same system, that applications for CRC-P round 2 came in after the closure of the 18th round and that the lodgement in that space was	Sauka	102	2/03/2017 0:00
Al-39	Carr, Kim	Digital Strategy and Operations	Remuneration package for the growth centre chairs	Senator KIM CARR: I do not have any further questions on the CRC Program. If there are any others, I will put them on notice. I had planned to put on notice a few questions about the growth centres but there are some matters that interest me directly. Do you have the remuneration package for the growth centre chairs? Mr Lawrence: What do you mean? Senator KIM CARR: They get paid to chair these growth centres. Mr Lawrence: Yes. Senator KIM CARR: How much do they get paid? Mr Lawrence: That is determined by their boards. The amount that they are remunerated is determined by their own boards. Senator KIM CARR: So you do not have a figure for me? Mr Lawrence: I would have to take that on notice. They are remunerated by their boards and that is determined byåé." Senator KIM CARR: Yes, Okay. Could I get the package for each growth centre chair and CEO, if you would not mind. I presume you would have to take that on notice as well. Mr Lawrence: Yes. Senator KIM CARR: Are there travel costs and administrative costs? Mr Lawrence: That is all taken out of the operational costs. Senator KIM CARR: If you could provide me with advice on those matters. Mr Lawrence: I think we need to understand that the department provides operational funding to the growth centres and they determine how theyâc." Senator KIM CARR: Sure, but it is still public money, Mr Lawrence, isn't it? You will have an acquittal process for that so you will be able to tell me. Mr Lawrence: We will have to check with each of the growth centres and go through their budgets. Senator KIM CARR: It would not take you that long, would it? Mr Lawrence: It should not. A1-40	Xenophon, Nick	Geoscience Australia	Identified resources in the Bass Strait	Senator XENOPHON: Okay. What can you tell me about identified resources in the Bass Strait? Dr Johnson: In Bass Strait, the identified gas resources are of the order of 10,000 petajoules. To put that into context, the identified resources Australia wide are around 279,000 petajoules. So it is a significant amount but, in the national context, relatively minor. Senator XENOPHON: What do 10,000 petajoules translate to? How much does industry use? How much does a power station use, for instance, on an annual basis? Dr Johnson: Annual production in Australia is around 3,000 petajoules and that will include the amounts that are consumed domestically and the export amounts. Senator XENOPHON: What is domestic? What would the domestic amount be? Most of it is exported&"is that right? Dr Johnson: To give you an accurate answer, I would need to take that on notice. Broadly speaking, 50 per cent is consumed domestically at the moment and 50 per cent exported. That ratio will change because of course we are on an expanding export trajectory. 				Senator BUSHBY: I have a couple of questions along the lines of Senator Xenophon's questions about resources, and what is proven and also a bit about prospectivity. How much gas is proven to be available in eastern Australia, including Victoria? Dr Johnson: In eastern Australia, in the broad, there would be a little over 100,000 petajoules. That is Queensland, New South Wales and Victoria, onshore and offshore. And that is in the identified resources category, which is essentially reserves which are commercially viable today, and the category of contingent resources, which are geologically proven upå€"they have been proven up by the drill&"but require some other contingency to make them economic. Senator BUSHBY: So they are proven to a much higher level than what you might think is there by declaring an area prospective? Dr Johnson: Yes, they area€"a higher level of geological confidence than what we would categorise as prospective resources. Senator BUSHBY: So that is 100,000, and it was 279,000 you said of proven resources? Dr Johnson: Of identified resources for Australia in total. Senator BUSHBY: So about 100,00 of that at this stage is what we are aware of in eastern Australia. Presumably there are also prospective areas that have not yet had the work done to that standard to determine whether there are resources there? Dr Johnson: That is correcta€"a significantly higher figure for prospective resources nationwide. Senator BUSHBY: I am interested in eastern Australia&" (victoria, even Tasmania to some degree. Dr Johnson: I do not have a figure but I could take it on notice for eastern Australia. We have recently published some preliminary figures for			
AI-41	Bushby, David	Geoscience Australia	Available Gas in Eastern Australia	Victoria in terms of prospective resources and they tally to around 29,000 petajoules.	Spoken	110-111	2/03/2017 0:00
Al-42	Bushby, David	Geoscience Australia	Prospectivity of Sorell Basin	Senator BUSHBY: The reason I was saying that is I have asked Dr Pigram on a number of occasions about the prospectivity of Sorell Basin and whether there has been any interest in exploring that, being a senator for Tasmania and Sorell Basin being off the west coast. I understand that it does have a degree of prospectivity that makes it suitable for exploration, but it does not seem to attract a lot of interest. I was wondering whether there had been any interest. Dr Johnson: There has not been any recent work by Geoscience Australia in the Sorell Basin. We did have it as part of the acreage release package. I would have to check exactly, but it was approximately three years ago. There were no work bids such that no acreage was awarded. As to whether there have been any expressions of interest to GA, I am unaware of any but I would need to take that on notice and ask my colleagues.	Spoken	111-112	2/03/2017 0:00
Al-43	Xenophon, Nick	Geoscience Australia	Gas resources in South Australia	Senator XENOPHON: Do you have a figure for the estimated gas resources in South Australia? Dr Johnson: I would need to take that on notice because there would be some breakdown of analysis that would have toât." Senator Canavan: I think it is also important to note that some of these basins overlap. They do not follow state boundaries precisely. So, while we have been providing figures for Gippsland and Otway, I believe the Otway basin, at least, may straddle some ofât."	Spoken	113	2/03/2017 0:00
				Senator XENOPHON: In the past you have used the icebreaker Aurora Australis for collection work, is that right? Dr Johnson: I would have to take that on notice. Senator XENOPHON: Will the icebreaker that is currently being built in Romania be used to do that work as well? Could you take that on notice? Dr Johnson: Certainly. Madam Chair, may I provide a clarification to my previous answer to Senator Xenophon specifically around the bathymetry component of his question earlier? I will pass to my			,
AI-44	Xenophon, Nick	Geoscience Australia	Aurora Australis	colleague. Senator BUSHBY: And I have already asked for a brief summary. What proportion of the work that you do would be based on Building Australia's Resource Wealth and what proportion of your work would be based on other aspects? Dr Johnson: I could take that on notice and provide you with a breakdown.	Spoken	114	2/03/2017 0:00

				Control VENORUON, At the control of control			
				Senator XENOPHON: At the moment, if somebody wants to contest itâ€" someone is holding onto a			
				resource, others say, 'We think we can use it, we can do a better job'â€"before they could make a bid			
				on it, they would have to have access to all of the seismic surveys, all of the technical data, wouldn't			
				they? Mr Waters: They certainly would be helpful to them, yes. In most cases, and if we are talking			
				primarily about Bass Strait, the vast majority of the 2D and 3D seismic surveys that have been shot over			
				that area is available for public review. Senator XENOPHON: Sure, but if there is something that the			
				original exploration company with the retention lease actually have, they are not obliged to share that			
				with a company contesting their use of itâ€"is that right? Mr Waters: That is a commercial matter that			
				we would not get involved in. Senator XENOPHON: All right, but you can understand the disadvantage			
				that a company may have in those circumstances? Senator Canavan: I can certainly understand the			
				point of the question. I have asked similar questions of NOPTA on those things. With your particular			
				interest in Bass Strait, given it has been a long developed historical gas resource for Australia, there			
				does seem to be a lot of public data available on those aspects that would assist third parties making			
				those applications if they saw fit. Senator XENOPHON: I want to put on notice: if there is to be genuine			
				contestability, the argument could be that a company is seeking to challenge the existing leaseholder or			
				potential leaseholder, is there an administrative process or a fair use process for them to have access			
				to all of the data so that they can make an informed to bid before they make a decision? One scenario			
				that has been put to me is that the holder of the retention lease may have drilling resources tiled up			
				elsewhere in the world and it may not be a priority for them, that particular retention lease. Other			
				potential bidders may have drilling resources available that may tip it into the commercial viability			
AI-46	Xenophon, Nick	Resources	Retention Leases	sphere. That is one scenario that has been put to me.	Spoken	117	2/03/2017 0:00
				Senator XENOPHON: It is just the sheer exhaustion from the exhilaration of estimates. The concern is			
				that there may actually be impediments to having the most robust level of contestability in access to			
				data. If you are trying to get access to data, and that oil company that has been exploring has got all of			
				this material, then you are not going to be able to make an informed bid. Also, can you take on notice,			
				Minister and NOPTA: are there other regimes elsewhere in the world where there is a greater level of			
				contestability than what we have in Australia? In other words, is there a use-it-or-lose-it approach that			
				is more immediate in other countries? Again, I have absolutely no criticism of NOPTA. You are clearly			
				working diligently through the existing framework but I am just wondering whether other parts of the			
				world have a more contestable arrangement? Senator Canavan: I am happy to do that, Senator			
				Xenophon. I would noteâ€"I think it was at the last estimatesâ€"question SI-42, where we did provide			
				some information in that regard on situations in other countries. Obviously that is there for you to			
				review. There are often, what seems to be generically called, 'holding' titles in other parts of the world			
AI-47	Xenophon, Nick	Resources	Access to data	in the OECD. We have a renewal licence system and we can provide some further details.	Spoken	118	2/03/2017 0:00
				Senator BUSHBY: I have just a couple more question. I asked Geoscience Australia immediately before			
				you came in, and I have asked them on a number of occasions, about the Sorell Basin. You probably do			
				not have the map now, but it is on the west coast of Tasmania, so not in Bass Strait. If you follow the			
				Great Australian Bight all the way round, it is south of King Island, basically, and west of Tasmania. That			
				has apparently shown reasonable signs of prospectivity according to Geoscience Australia. A few years			
				ago it was put out as part of the acreage release but did not attract much, if any, interest. I was just			
				wondering, and I asked Geoscience Australia whether they knew why it did not, and they suggested			
				that you might have some knowledge. Take that on notice, please. Mr Waters: I think I would need to,			
				because I am not familiar with it. There are a number of disparate reasons why a company may indicate			
				interest in a particular area in the precompetitive phase of acreage release but then not actually bid for			
				it once it is released. Senator BUSHBY: I do not even know if anybody showed any interest at the			
				precompetitive level, so can you have a look at that and let us know whether there was any interest at

				Senator 2000 IIII. can you picase committee as that the immister has formally accepted two recent			
				additional national radioactive waste dump site nominations from the Kimba district in South			
				Australia? Senator Canavan: No, I have not accepted those proposals at this stage. I have received two			
				formal applicationsâ€" Senator LUDLAM: Okay. Received not accepted. Senator Canavan: from the			
				Kimba area, but they have not been accepted yet. Senator LUDLAM: It seems a bit silly to direct that to			
				Mr Sheldrick when you are sitting right there. My apologies. Senator Canavan: That is alright. Senator			
				LUDLAM: Given that a couple of previous nominations from that area were not selected and short-			
				listed for further consideration as part of the formal site selection process that ran for 18 months or so,			
				what is different about these two new sites that even causes you to have them on your desk? Senator			
				Canavan: Senator Ludlam, I am happy to give you the time line here, if you likeâ€" Senator LUDLAM:			
				Yes, please. Senator Canavan: and pull me up if I am giving you too much information. As you would be			
				aware, on the short-listing of the Barndioota site last year we indicated an openness or that we would			
				welcome further voluntarily proposals from landowners. Senator LUDLAM: I remember. Senator			
				Canavan: In the second half of last year, I was advised that there was some renewed interest from			
				landowners from different properties in the Kimba region than proposed previously. On receiving that,			
				I indicated that I was happy to meet with the applicants, as well as the local council and some other			
				community members. Following those discussions, I obviously spoke to my department. The			
				department felt it would be important to assess the situation on the ground in Kimba before we made			
				any decision; so they will go to the detail. They have done that over the last few months and have			
				provided some analysis for me that I will consider in making a determination in this case. Because the			
				decision is before me, I will not go into all of the details, although I think the department have been			
				very transparent with the affected community members, and they might go into what they have			
				produced and the advice they have provided me. The difference here, if you like, that seems to have			
				triggered the most interest in these proposals is that the neighbouring landholders are relatively			
				supportiveâ€"at least it is my understandingâ€"compared to the previous submission from Kimba. I			
				have not made a final decision yet, but there has been an extensive process to try and assess what, if			
			National radioactive waste dump site	anything, has changed. Mr Wilson or Mr Sheldrick, do you want to add anything? Mr B Wilson: I think			
AI-49	Ludlam, Scott	Resources	nominations		Spoken	121	2/03/2017 0:00
				Senator KETTER: Finally, I understand there are about 100 different locations around Australia where we currently store nuclear waste. Is that correct? Mr Sheldrick: That is correct. Senator LUDLAM: How many of those 100 sites will close if the dump gets on its feet? Mr B Wilson: I cannot answer that. Senator KETTER: Can you tell me: what is the cost to theâ€" Senator Canavan: The important thing for me in particular is that we have made commitments to the community of Lucas Heights to find a permanent store for the waste that is held there. I am very committed to ensuring that we honour the commitments we make to any community that accepts a waste facility. The Lucas Heights community went through a process when that facility was established; we promised to find it a permanent home, and I think we will live up to this promise as best we can. Mr B Wilson: Could I also add that it is not about closing the number of the sites; if nuclear waste is generated or held, it needs to be stored somewhere before it is then moved somewhere else. We are about providing a long-term solution for that waste. Most of these sites are not built for long-term storage or disposal, so our aim would be to create a national facility where the waste can transit as quickly as possible to the national facility and then be looked after over the longer term. Senator KETTER: I will finish by asking: what do you estimate are the costs to the Commonwealth of our current nuclear storage facilities across the 100 or so sites, and what is the expected cost of running the new waste storage facility? Mr B Wilson: Again, I cannot answer that specifically. Quite a number of those 100 sites are not Commonwealth-owned sites; they are state sites or universities or hospitals, or sites like that. There are a small number of			
				Commonwealth holdings, largely CSIRO and ANSTO but also Defence and a number of other establishments. We have not done a costing for what that holding isâ€"that I am aware ofâ€"at this point. We are working through, as part of our process for the new facility, a detailed business case which will be looking at the costs of maintaining the status quo for the Commonwealth versus the costs of alternative arrangements such as this facility. That will all be part of the consideration that goes into			
AI-50	Ketter, Chris	Resources	Nuclear Waste Storage	cabinet's decision on the waste facility. Senator KETTER: I am interested in those figures. Are you able to take those on notice? Al-56 Al-57	Ketter, Chris	Office of Northern Australia Office of Northern Australia	Energy generation projects Referred projects to NAIF	Senator KETTER: Moving to a bit more detail about the energy generation projects, you have indicated that there are 20 out the 100 inquiries. Is that the case? Ms Walker: Yes. Senator KETTER: Can you tell us the nature of those energy projects? Are they gas, renewable, coal-fired or all of the above? Ms Walker: I do have that information, but at this point I would have to take it on notice. I do not have it with me at the moment. Senator Canavan: We will take that on notice. Senator KETTER: I have series of questions in relation to that. Are you able to say how many coal-fired power generation projects you are currently considering? Ms Walker: No. I would have to take any more detail on notice. Senator KETTER: If you are considering coal-fired power generators, when did you start progressing those applications? Senator Canavan: We will have to take that question on notice as well, given that the premise goes to the previous question, which we did take on notice in terms of if there are any coal in the 20, but I am not aware of that. But your second question is redundant, so we will take that on notice. Senator KETTER: Minister, on ABC radio, on 2 February, you said that you received interest over the past week associated with a commitment to build baseload power stations, including to support clean coal options. Have you referred any of those approaches to NAIF? Senator Canavan: I have certainly had discussions with people, and I have indicated publicly and in discussions with others that we have a Northern Australia Infrastructure Facility that can take applications for energy infrastructure. As Ms Walker mentioned before, this is a proponent led process. So it is up to those potential investors to bring them forward to the NAIF. I certainly think coal has a huge future in the world, and there is no reason why we, in Australia, should not be looking at it as well, given that we are the world's largest coal exporter. Senator KETTER: Ms Walker, are you aware of the interest that the minister has just told us abo	Spoken Spoken	131-132	2/03/2017 0:00

				Senator KETTER: To understand what you said before, Mr Coffey: am I correct in saying that the ONA			
				does not itself have plans to address water shortages in Townsville? Mr Coffey: No. The responsibility			
				sits with the Department of Agriculture and Water Resources and of course the state government. They			
				determine and make some of those decisions, but we will work closely with those jurisdictions and			
				departments to ensure that development across the north can take place. If there are challenges and			
				issues, then we will be talking to the responsible departments about those types of things. Senator			
				Canavan: And, just to be clear, the government certainly has a plan to help tackle the water situation in			
				Townsville, but the responsibility for that is with the Department of Agriculture and Water Resources.			
				Senator KETTER: In terms of the development of those three plans we were talking about, you have			
				said they are not directly within your jurisdiction, but can you tell us which groups have been engaged			
				with in developing those plans? Senator Canavan: I will have to take that on notice. I know there has			
				been a role for Townsville Enterprise Limited in this process. I am not sure of the status of that. As I say,			
				there have been some disagreements and delays in deciding on funding agreements with the			
				Queensland state government. I believe they have only been resolved relatively recently, but I do not			
				have the up to date details on hand. I will take that on notice, and we will probably have to consult with

				Senator KETTER: Minister, are you aware of any other options other than the land that was previously			
				earmarked for compulsory acquisition? Senator Canavan: Yes, I am. I mentioned trips particularly to the			
				Charters Towers regionâ€"there was a group of landholders that were putting forward an option I			
				believe west of Pentland, a town west of Charters Towers. It was a property apparently on saleâ€"I			
				cannot attest to it myselfâ€"but that was something that was put forward to the defence department			
				and they had agreed to have a look at that. Again, you will have to check with them on the latest status			
				but the last time I checked they were still looking at that option. To answer your question fully, there			
				was a range of other options put by different people around the country, and I often did talk to			
				Defence about the relative merits of those or otherwise. They would obviously put forward their			
				proposals based on their assessments. Senator KETTER: Is this the property which I understand is			
				known as Longton? Senator Canavan: I could not tell you. I would have to take that on notice. It is a

				Con the December of the Control of the CCC Floridity and the 2.1 Here were the		
				Can the Department update the Senate on one of the CCS Flagship projects? 1. How many tonnes of		
				CO2 have been stored by the Flagship projects since the program was established in 2009? 2. Is the		
				department confident it will achieve its objectives, and that of the G8 and the Global CCS Institute, of		
				"widespread national and international deployment of CCS technology from 2020.‮. Will any of		
				the projects be operating commercially by 2020? 4. In particular, will the CarbonNet Project in		
				Victoria's Latrobe Valley be operating by 2020? 5. The background to these questions is that		
				Kawasaki Heavy Industries and Toyota are stating to the media that they intend to extract hydrogen		
				from brown coal in the Latrobe Valley and store resulting greenhouse emissions using a CCS project in		
				the area. The aim appears to be to showcase hydrogen car technology at the Tokyo Olympics. Recently		
				a representative of the Global Carbon Capture and Storage Institute told the Australian that CarbonNet		
				was close to selecting a reservoir in Bass Strait to store carbon dioxide. Plant builder Chiyoda Corp and		
				Electric Power Development Company of Japan are also working on the project, which is aiming to have		
				the first batch of Australian hydrogen arrive in Tokyo in time for the Olympics. The Tokyo Olympics		
				start in July 2020 Does the department think that timeframe is achievable? 6. A 2012 brochure		
				published by the Victorian Government (attached) said that:Over the next two years, The CarbonNet		
				Project will evaluate short-listed potential storage sites, followed by the drilling of data appraisal wells,		
				with the aim of selecting high grade site(s) for detailed mapping. This will determine viable locations for		
				the safe, long term storage of CO2 . That was 5 years ago that a site was going to be selected in two		
				years. Why are we still only "close to selecting' site? 7. The 2012 brochure states that the project		
				was in the â€~Feasibility' stage gate. What stage is the project in now? 8. What is the budget of the		
			Carbon Capture and Storage Flagships	CarbonNet project from the CCS Flagships program? 9. How much of the CarbonNet project's \$100

				In the Queensland Land Court case against the Carmichael Mine Proposal, economic modelling was		
				commissioned by proponents Adani, conducted by ACIL Allen. The modelling exercise assumed that any		
				amount of coal produced by Adani would result in the same amount of coal not being produced by a		
				coal producer elsewhere in the world. In aggregate, ACIL found that the construction of the Carmichael		
				mine would slightly reduce the supply of coal in the world. 1. Does/would OCE use similar		
				assumptionsâ€"that production of one mine is exactly offset by reductions in production		
				elsewhereâ€"in modelling it conducts or commissions? 2. Does any OCE research conclude that		
				building a large coal mine could reduce the world supply of coal? If yes, please provide. 3. Has OCE conducted or commissioned any research on how changes to Australian coal production affect: a.		
				world coal price b. World coal consumption c. Greenhouse gas emissions from global coal fired power If		
				yes, please provide 4. The Australia Institute and Centre of Policy Studies recently published estimates		
				of economic impacts of a moratorium on new coal mines and major coal expansion in Australia. They		
				estimated impacts of: a. a difference in GDP in 2040 of 0.6% b. difference in employment peaks at		
				0.04% in 2030 Has OCE conducted any similar research on the effects of approving no new coal mines		
				or major expansions? If yes, please provide. 5. In December 2015 the NSW Department of Planning and		
				Environment published Guidelines for Economic Assessment of mining and coal seam gas projects. In a		
				section on Local Effects Analysis, the guidelines state: A range of techniques are available for estimating		
				second round or flow-on effects. These include CGE (computable general equilibrium)-modelling, Input- Output (I-O) or multiplier analysis. Does the OCE consider input-output or multiplier analysis suitable		
				for estimating the employment and economic impacts of resource projects at local, state or national		
				levels? 6. Has OCE been contacted by Australia's export credit agency, the Export Finance and		
				Insurance Corporation (EFIC) in regards to the Boikarabelo Coal mine? a. If so, when did this		
				consultation occur? Please provide what advice was given to EFIC. b. Has OCE conducted any
