2. What were the top 20 most accessed (by number of times accessed) unique domain names accessed by ABS staff in calendar year 2016?

Please note: the system used to retain such information at the ABS has 6 months of data readily available and that has been provided. The work required to extract 12 months of data would create an unreasonable diversion of resources. Based on patterns of data, it is also not expected that the full 12 months of data would create a materially different result.
