**QUESTION ON NOTICE
Additional Estimates 2016 - 2017**

Outcome: Higher Education Research and International

Department of Education and Training Question No. SQ17-000233

Senator Carr, Kim provided in writing.

Enhancing the Training of Mathematics and Science Teachers Program

Question

Have evaluation reports for projects funded under the Enhancing the Training of Mathematics and Science Teachers Program been received? If so please provide copies.

Answer

The Enhancing the Training of Mathematics and Science Teachers program and projects funded through it have been supported by ongoing formative evaluation since 2013. This included the initial assessment of project objectives, approach and associated risks. The formative evaluation also provided support to the projects in preparing statements of project logic and outcomes. Ongoing evaluations through the course of the program have been conducted and annual progress reports provided. The final program evaluation will be undertaken by mid-2017.
