

SQ17-000781 - Schools funding - non-government approved authorities above Commonwealth share of the SRS

Based on amended Australian Education Act 2013 settings.

These estimates are based on enrolment data reported to the Commonwealth Department of Education and Training as at 29 April 2017 and assumes the same student population applies from 2017 to 2027 to allow meaningful comparison. If the number of enrolled students in a school changes, this will be reflected in the final Commonwealth payment for the school for each year.

Average per student amounts vary according to the level of need. Schools with higher levels of need that benefit from the needs-based loadings are expected to have a higher per student amount. This includes Special and Special Assistance schools that have very high levels of need. During transition, the per student amount is also influenced by an Approved Authority's transition path.

This list includes non-systemic AAs. Funding for these will be calculated on a school basis, however these estimates are an average of those for the AA.

All figures are rounded and are an estimate only. No liability is accepted for any decisions made on the basis of this information.

Non-systemic AA figures are calculated at the individual school level, where some schools in the AA may be funded as 'below' schools, receiving a 6 year transition, and others may be funded as 'above' schools, receiving a 10 year transition. The figures for these non-systemic AAs are the average per student amount over the transition, where the average Commonwealth starting share is 'above' the target share.

*Please note: while all figures in this table are estimates only, the figures for these AAs may be particularly subject to change in line with updated student enrolment data. The Commonwealth Department of Education and Training will work with schools in these AAs to finalise funding estimates from 2018.

**Special Assistance or Special schools.

***An AA may have schools in more than one state.
