1- Regions showing no participants are expected to be serviced by the distance learning provider

2 -Regions with less than 20 are new delivery regions for AMEP or the SEE program.

3 -The total per state/territory may not equal the sum of the regions due to uncertainty of estimated participant size in new delivery regions.

4 - the budget allocation is based on estimated training hours rather than number of clients. The regions that have low proportion of clients size but high proportion of budget are resided by humanitarian clients who take up more training hours than other clients.

Proportion of clients estimated to attend public, private - for profit or private - not for profit institutions			
		AMEP	SEE
