QUESTION 8

Tourism Demand-Driver Infrastructure Programme (TDDI)

Page 129 – 130 of proof Hansard.

- a. **Senator SINGH:**[in relation to the TDDI Programme] I understand the tourism ministers meeting has agreed on guidelines for this program? Can they be tabled?
Mr Gospers: Yes. I can refer to the guidelines if you would like.
Senator SINGH: And could we have a copy?
Mr Gospers: I will take it on notice, and we will give it to you in that fashion—would that be acceptable?

- b. **Senator SINGH:** Can you tell me the dollar amounts for each state.
Mr Gospers: Yes, I can. It was a formula agreed by the states and territories, and all ministers. Would you like the figures for 2014-15, or the total over the four years?
Senator SINGH: Both.
Mr Gospers: ... I will give you the figures on notice.

Answer

- a. Tourism Demand-Driver Infrastructure (TDDI) programme funding will be managed through a Project Agreement between the Commonwealth and the states and territories. At the 11 July 2014 Tourism Ministers' Meeting a set of overarching principles were agreed for the programme. The principles have been incorporated into the Project Agreement and are as follows. States and territories will:
 - align projects to one or more of the *Tourism 2020* strategic areas or to a request by Tourism Ministers
 - demonstrate that each project will yield a return on the government's investment across the tourism supply chain
 - ensure the provision of funding that at least matches the Australian Government's contribution, noting that the funding can be sourced from either the public or private sector, or a combination of both. In kind contributions are not considered as matching funds
 - not use funding to create state-based substitutes for T-QUAL and TIRF grants
 - cooperate on spending funds on projects where benefits cross state borders
 - report annually on progress to the Australian Government through the Tourism Ministers' Meetings.

TDDI projects are also expected to align strategically with relevant state, regional and destination plans. Projects should create and encourage visitation to a destination; increase visitor expenditure; and increase tourism quality, to assist the tourism industry in meeting *Tourism 2020* targets.

Projects must fall into at least one of the following categories:

- Environmental – the development or enhancement of natural assets such, but not limited to, protected and recreational areas, public spaces such as beaches and parks and walking trails

- Enabling – such as, but not limited to, Indigenous tourism development, the development of tourism networks, plans and feasibility studies, and programmes to improve industry capability and capacity (eg business planning, workforce development, cultural awareness, and digital product development).

There are a number of activities that will be considered ineligible for the purposes of the TDDI programme. These activities are: marketing, advertising or product promotion; regular repairs and maintenance; upgrading or developing facilities predominantly for local communities; engaging or paying permanent employees; buying or leasing real estate of any type; and administrative or running costs that are normally the responsibility of a business, state or territory administration or local council.
