Finance	The information sought by the Senator's questions is extensive and varied and would involve an unreasonable/excessive diversion of resources across the Finance portfolio to provide a detailed answer.
	Much of the information sought already exists in the public domain through a range of avenues.
	For example, Commonwealth public works which are estimated to cost more than \$15 million must be referred to the Parliamentary Committee on Public Works (the PWC). The PWC inquires into and reports to the Parliament on each public work referred to it. The PWC's reports can be accessed via the following link: www.aph.gov.au/parliamentary_business/committees/house_of_representatives_committees.
	Leasing and occupancy information is available via the Australian Government Property Data Collection (PRODAC). PRODAC provides a central database on the office space leased and owned by the Australian Government. The Australian Government Office Occupancy Report 2009 is a whole of government report, which is based on the first PRODAC data capture in September 2009. The report provides a snap shot of Commonwealth property prior to the establishment of the Commonwealth Property Management Framework and is the baseline from which improvements to property management can be made over time. The Report can be accessed via the following link: http://www.finance.gov.au/property/property/property-data-collection.html .
	AusTender, the Australian Government's procurement information system provides centralised publication of Australian Government business opportunities, annual procurement plans, multi-use lists and leasing contracts awarded. AusTender information can be accessed via the following link: www.tenders.gov.au .
