Ports

Where available, dimensions for each major container shipping port are shown in the label as follows:
 D: Depth
 L: Length

For ports with designated container shipping berths, dimensions relate to the largest container berth. Some ports may have systems for adapting to larger ships than the berth dimensions indicate.

Container ships

The largest container ship for any given container shipping port may be estimated by using the "Containership Dimensions" diagram in conjunction with the depth and length values given for each port.
