Matters arising during the inquiry

Late return of responses to questions on notice

1.15 The committee has repeatedly expressed its concern in previous reports about past failures to provide responses in a timely manner and its expectation that responses to questions on notice should be provided to it by the due date.

1.16 While acknowledging that there were no answers outstanding from previous estimates rounds at the commencement of these Budget Estimates hearings, the committee notes that answers were still being provided to the secretariat on the last working day before this round of hearings commenced – some six weeks after the date the committee had set for the return of answers.

1.17 In setting 31 July 2007 as the deadline for answers to questions on notice from the current round of hearings, the committee believes that it is allowing ample opportunity for answers to be carefully considered and submitted in a timely manner.

Comprehensiveness of Budget Estimates process

1.18 As the Chair has noted in previous estimates,³ the committee expects that all agencies will be available for the main round of Budget Estimates, unlike Supplementary Estimates where senators nominate agencies they wish to examine.

1.19 For this round the committee again continued its practice of listing all government companies in the program under the relevant departmental outcome, in the interests of comprehensiveness and transparency. It is left to the discretion of officials to determine whether company representatives need to attend the hearings in person or whether departmental officers are sufficiently knowledgeable to respond to the committee's inquiries on their behalf.

1.20 While not all government companies were the subject of questioning on this occasion, the committee believes that, by including all relevant government agencies in the hearing program, senators are made aware of the opportunity to be able to hold them to account for their activities at least once a year.⁴
