Notes:

- Students have been counted once in this table if they were a domestic non-fee-paying undergraduate student at any point during the year. This excludes only those students where every unit undertaken was coded as "fee-paying".
- These enrolment figures may not match others published as they are generated from liability status files rather than enrolment files.
- The commencing figures for the revised scope vary slightly from those shown in the earlier table (QoN E901_04). The numbers previously provided for the commencing revised scope were based on a old scope "commencement status" formula. The figures in the above table correctly represent the commencing revised scope.
- Numbers for completions vary slightly from those shown in the earlier table (QoN E901_04). The numbers previously provided excluded all students that had any "fee-paying" units. The above table now correctly calculates them, by excluding only those students where every unit was coded as "fee-paying".
