Question No. 98

Senator Ludwig asked the following question at the hearing on 13 February 2007:

CMR: On what date prior to 12 October 2005, was the last capacity review?

The answer to the honourable senator's question is as follows:

Capacity reviews are an ongoing business-as-usual activity and are undertaken regularly as part of the monitoring and management regime for CMR. Prior to the 12 October 2005, and afterwards, stress and volume testing, including reviews of capacity requirements, were performed on a daily basis by a dedicated team of specialists.
