

To Senators on the Senate Select Committee on Climate Policy,

If you let this bullshit existing bill go thry you must be mad. The planet environment is visibly destructing before our eyes, turning into the biggest catastrophe in human history since Toba blew up, and you are fiddling while it burns?

Can you imagine how all you fiddlers will be condemned by your grandchildren as they suffer your cowardice, or greed, or blindness or whatever you politicians are suffering from?

Blow this criminal crap out of the water and get serious about converting our economy into a green economy that will set an example. Lead - THATS YOUR JOB.

Name: James Pillsbury
